PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

23/98

Other whiteboard and mind map tools it is graded above

Collaboard's GPA of 2.2 is higher than 23 of the 98 other whiteboard and mind map tools we grade, and level with 19.

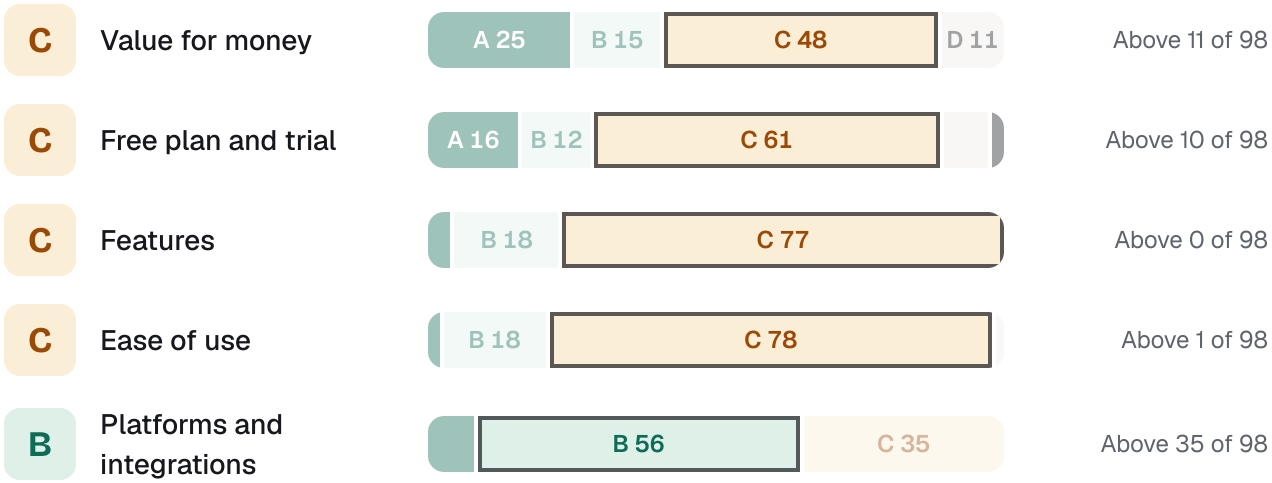

It stands best on platforms and integrations (B, above 35 of 98) and worst on features (C, above 0).

Its paid plans start at $6 a month for each person, against a middle price of $8 for the category: 20 of the 69 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 9 tools score higher and cost less.

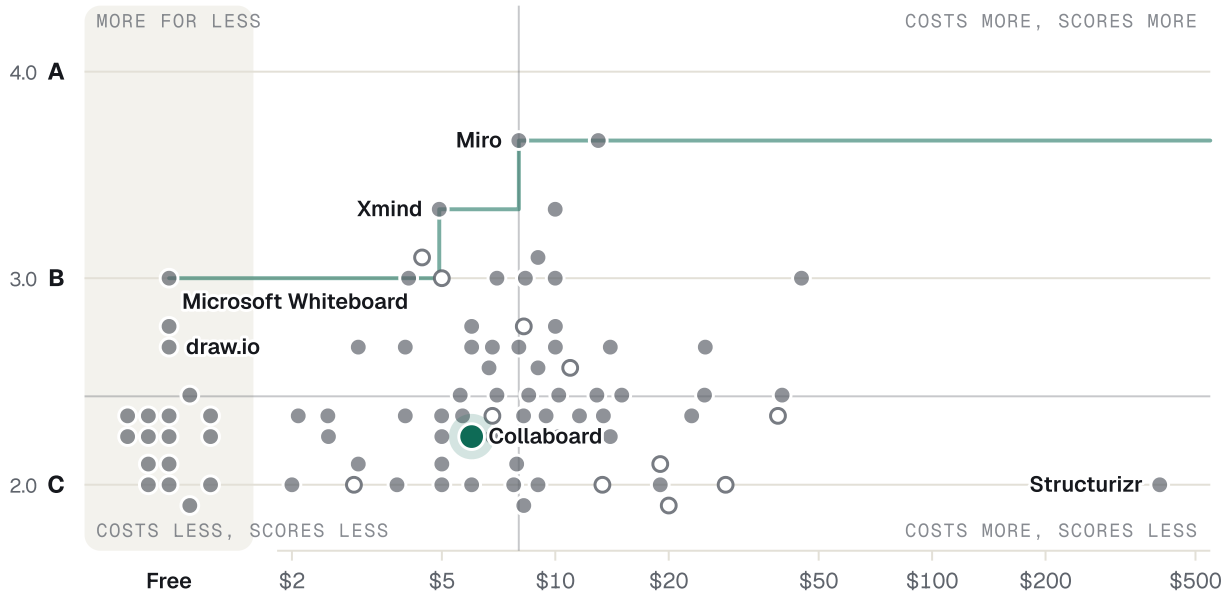

Each grade against the category

Every bar is all 99 whiteboard and mind map tools we grade, cut by the letter each got. Collaboard's own letter is outlined.

Price against what you get

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Collaboard you could make: mind mapping and templates. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 56 of the 98 other whiteboard and mind map tools grade higher. It costs $72 a year.

What you could make

- Mind mapping and templates: an app builder makes these well.

What you could not

- An endless canvas that stays smooth with hundreds of things on it.

- ✕ Several people working in it at the same moment.
- ✕ It plugs into other products, Microsoft Teams, Cisco Webex and Pexip among them, and has an API.

What this rests on. Collaboard's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
