PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

0/101

Other hiring and applicant tracking tools it is graded above

Spark Hire Recruit's GPA of 1.4 is higher than 0 of the 101 other hiring and applicant tracking tools we grade, and level with 5.

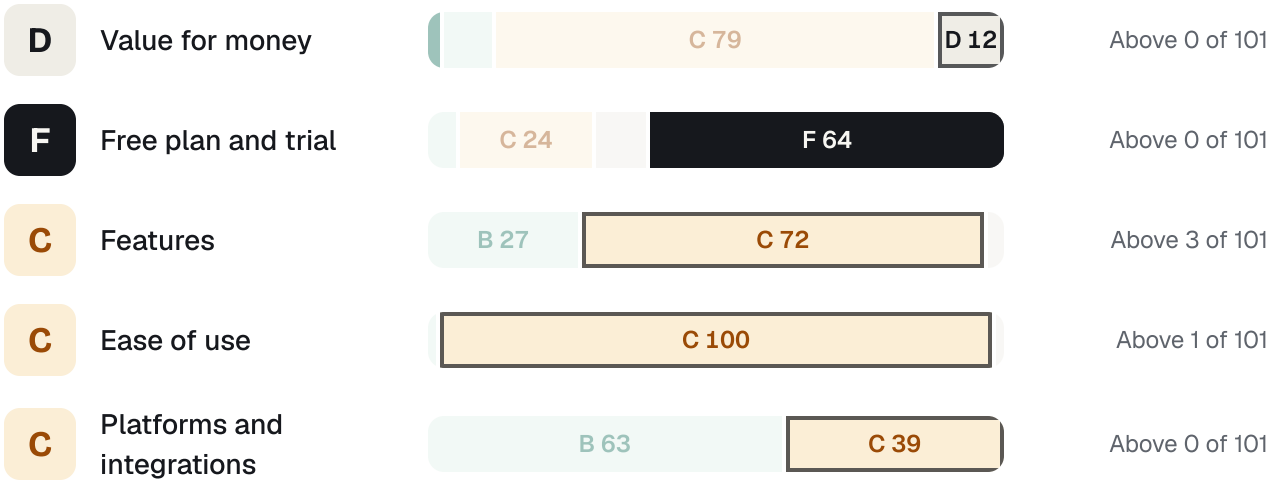

It stands best on features (C, above 3 of 101) and worst on free plan and trial (F, above 0).

Its paid plans start at $335 a month, against a middle price of $99 for the category: 37 of the 42 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 32 tools score higher and cost less.

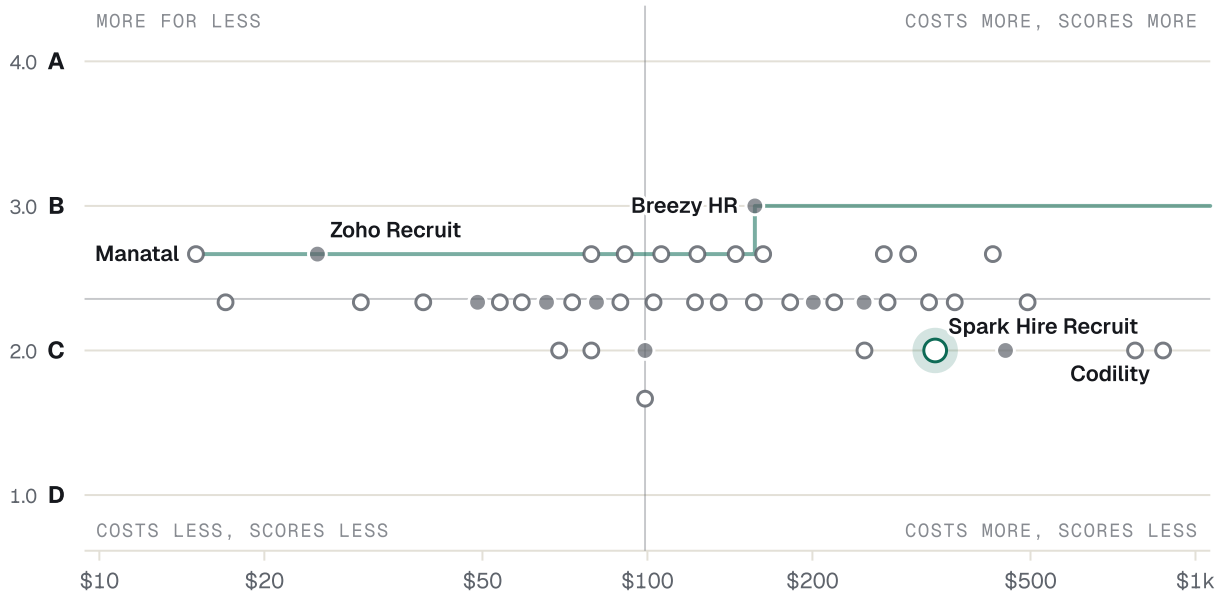

Each grade against the category

Every bar is all 102 hiring and applicant tracking tools we grade, cut by the letter each got. Spark Hire Recruit's own letter is outlined.

Price against what you get

Each dot is one of 43 hiring and applicant tracking tools. Further left costs less; higher up scores better on features, ease of use and platforms. Spark Hire Recruit is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Spark Hire Recruit you would be making jobs posted to dozens of job boards at once, which takes an agreement with each board. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 96 of the 101 other hiring and applicant tracking tools grade higher. It costs $4,020 a year.

What you could make

- Applicant tracking and reports: an app builder makes these well.

What you could not

- Jobs posted to dozens of job boards at once, which takes an agreement with each board.
- Connections to other products, each kept working as those products change.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. Spark Hire Recruit's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
