PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

26/134

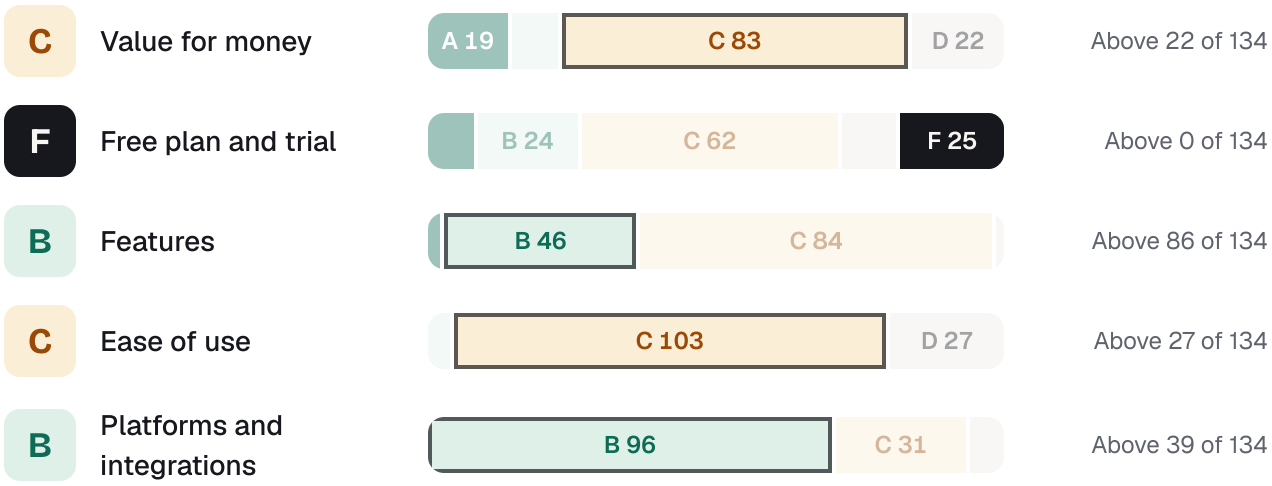

Other automation tools it is graded above

Comidor's GPA of 2.0 is higher than 26 of the 134 other automation tools we grade, and level with 27.

It stands best on features (B, above 86 of 134) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 135 automation tools we grade, cut by the letter each got. Comidor's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Comidor you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 81 of the 134 other automation tools grade higher.

What you could not

- ✕ Connections to other products, each kept working as those products change.
- ✕ A builder that other people can use without writing code.
- ✕ A tool that builds and hosts other apps.
- ✕ AI features, unless you pay a model provider for each request yourself.
- ✕ Sharing with other people, which means accounts and invitations.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Comidor's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
