PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

0/89

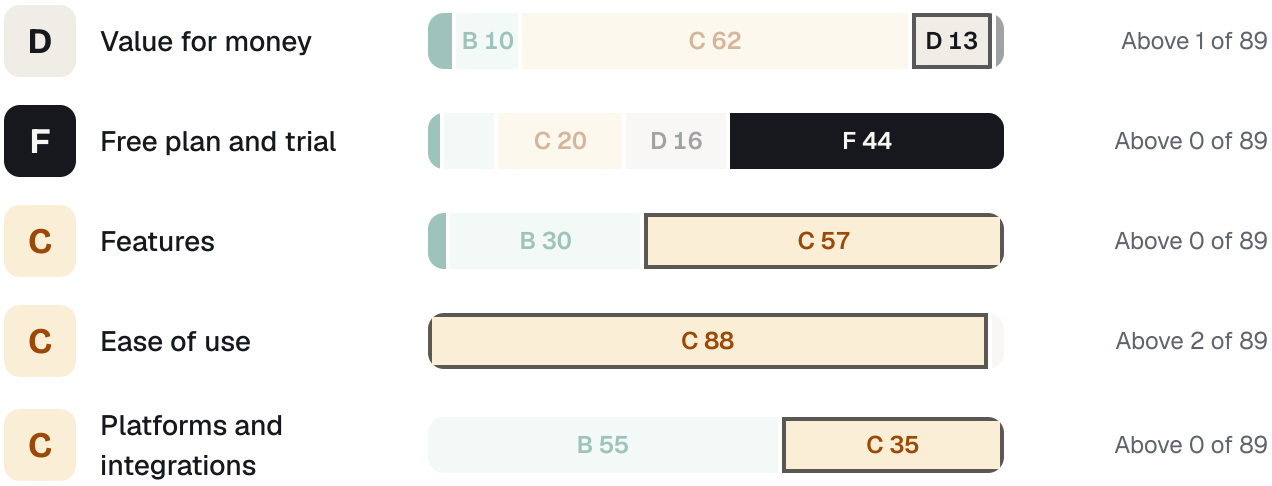

Other affiliate and referral tools it is graded above

Commission Factory's GPA of 1.4 is higher than 0 of the 89 other affiliate and referral tools we grade, and level with 2.

It stands best on ease of use (C, above 2 of 89) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 90 affiliate and referral tools we grade, cut by the letter each got. Commission Factory's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Commission Factory you would be making payouts to partners in many countries, with their tax forms. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 87 of the 89 other affiliate and referral tools grade higher.

What you could make

- Reports: an app builder makes this well.

What you could not

- Payouts to partners in many countries, with their tax forms.
- Every click and sale traced back to the right partner.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. Commission Factory's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
