Other antivirus apps it is graded above

Comodo Internet Security's GPA of 2.6 is higher than 41 of the 56 other antivirus apps we grade, and level with 8.

It stands best on value for money (A, above 54 of 56) and worst on platforms and integrations (D, above 0).

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Comodo Internet Security you would be making an engine that recognises new malware as it appears. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.6 is higher than 41 of the 56 other antivirus apps we grade.

What you could not

- ✕ An engine that recognises new malware as it appears.
- ✕ Files kept in step across devices without losing one.
- ✕ A real app for Windows. Something home-made would be a web page.

What this rests on. Comodo Internet Security's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
