Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from ConnectPOS's own pages, its app-store listings and our grades. Every fact in it is on ConnectPOS's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 11 of the 72 other inventory management tools we grade

ConnectPOS is a point-of-sale platform that keeps in-store stock, orders and customers in sync with online stores on Shopify, Magento, BigCommerce, WooCommerce and others. It also sells an inventory module for multiple warehouses, transfers and stock-takes. Plans are priced per register.

To get you started, here are **8 things to know about ConnectPOS**, taken from its own pages and our grades.

> "
>
> **No store rating is on record, and you have to connect it to an online store and set up registers before it does anything.**
>
> From our grade for ease of use

1 **Best for a till that syncs stock with a Shopify or Magento store**

ConnectPOS is a cloud till that keeps store stock and orders in step with Shopify, Magento, BigCommerce and WooCommerce shops, and keeps selling when the internet drops.

2 **Paid plans start at $39 a month**

As its pricing page puts it: $39 per register / month, billed yearly ($49 billed monthly).

3 **It runs on Web**

Web.

4 **Online store sync**

Syncs products, stock, orders and customers with Shopify, Magento, BigCommerce, WooCommerce, NetSuite and Commercetools.

5 **Offline mode**

Switches to an offline mode when the internet drops so sales can continue.

6 **Stock transfer and stock-take**

Premium adds stock transfers, stock-takes and multi-source inventory.

7 **A 1.8 GPA, above 11 of 72**

That is against the other inventory management tools we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

The plain part of ConnectPOS you could make: inventory and reports. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

ConnectPOS at a glance

PRICING Paid, from $39 per register / month, billed yearly ($49 billed monthly)	FREE PLAN No
FREE TRIAL None stated	RUNS ON Web
MADE BY ConnectPOS	CATEGORY Inventory Management
OUR GRADE 1.8 GPA, weak	

The report card

Best for a till that syncs stock with a Shopify or Magento store

ConnectPOS is a cloud till that keeps store stock and orders in step with Shopify, Magento, BigCommerce and WooCommerce shops, and keeps

selling when the internet drops. Stock transfers and stock-takes sit on the $89 plan, and every price is per register.

TOOLGPA REPORT CARD

ConnectPOS

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	B	$39 per register a month on the yearly plan is inside the cheapest quarter of inventory tools, which start at $49. It is per register, though, so each till adds to the bill.
Free plan and trial	F	The listing records no free plan and no trial, so the way in is paying.
Features	C	Online store sync, offline mode, reports and a stock module. The listing's own gap is that stock transfer, stock-take and multi-source inventory need Premium, and it is a till first with the full inventory product sold apart.
Ease of use	C	No store rating is on record, and you have to connect it to an online store and set up registers before it does anything.
Platforms and integrations	C	Kiosks, tablets, phones and desktops through the browser, with Shopify, Magento, BigCommerce, WooCommerce and NetSuite listed. The pages do not name the devices more exactly, and there is no desktop app.

Grade point average Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who ConnectPOS is for

- ✓ Fits if you have a shop and an online store on the same platform and want one stock count
- ✓ Works for stores that have to keep ringing up sales when the internet goes down

Who it is not for

- ✗ Pricey if you run several registers, because $39 to $89 is charged for each one, and $10 more on monthly billing
- ✗ Watch out: stock transfer, stock-take and multi-source inventory are on the $89 Premium plan only
- ✗ Not for you if you want a free plan or trial, as none is recorded in the listing
- ✗ Too light for a full inventory system on the cheaper plans, since the inventory product is sold separately

Good to know

Good for

- ✓ Retailers with a physical store and an online store on the same platform
- ✓ Stores that need to keep selling during internet outages
- ✓ Multi-warehouse retailers needing stock transfers

Worth knowing

- ⓘ Prices are per register; the page does not say per month, so the billing basis should be confirmed.
- ⓘ Stock transfer, stock-take and multi-source inventory require the Premium plan.
- ⓘ It is a POS first; the full inventory management product is listed separately.
- ⓘ Which devices it runs on is described only as kiosks, tablets, smartphones and desktops.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$39
A month to start

ConnectPOS is a paid product, starting at $39 per register / month, billed yearly ($49 billed monthly).

Ways to pay less

ANNUAL DISCOUNT

Lower per-register price on yearly plan

The pricing page lists $10 less per register on every paid tier when the Yearly Plan is chosen instead of Monthly.

Stated on connectpos.com

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Cloud POS that syncs store stock with online stores. Here is what it does, as its own site describes it, and what it covers: reports, inventory, barcode scanning, dashboards.

> **Online store sync, offline mode, reports and a stock module.**

From our grade for features

Online store sync

Syncs products, stock, orders and customers with Shopify, Magento, BigCommerce, WooCommerce, NetSuite and Commercetools.

Offline mode

Switches to an offline mode when the internet drops so sales can continue.

Stock transfer and stock-take

Premium adds stock transfers, stock-takes and multi-source inventory.

Inventory module

A separate inventory management product with multi-warehouse tools, replenishment alerts, forecasting and audits.

Payments and loyalty

Works with payment gateways such as Stripe, Adyen and Authorize.net, with loyalty and gift card support.

Reporting and dashboards

Reports and analytics on every plan; the inventory module adds custom report fields and dashboards.

Where it runs

What it works with

Shopify
Magento
BigCommerce
WooCommerce
NetSuite
Stripe
Adyen
DHL

ConnectPOS is made by ConnectPOS.

Where it stands

Its grades against its category, and whether to keep it or make your own

11/72

Other inventory management tools it is graded above

ConnectPOS's GPA of 1.8 is higher than 11 of the 72 other inventory management tools we grade, and level with 16.

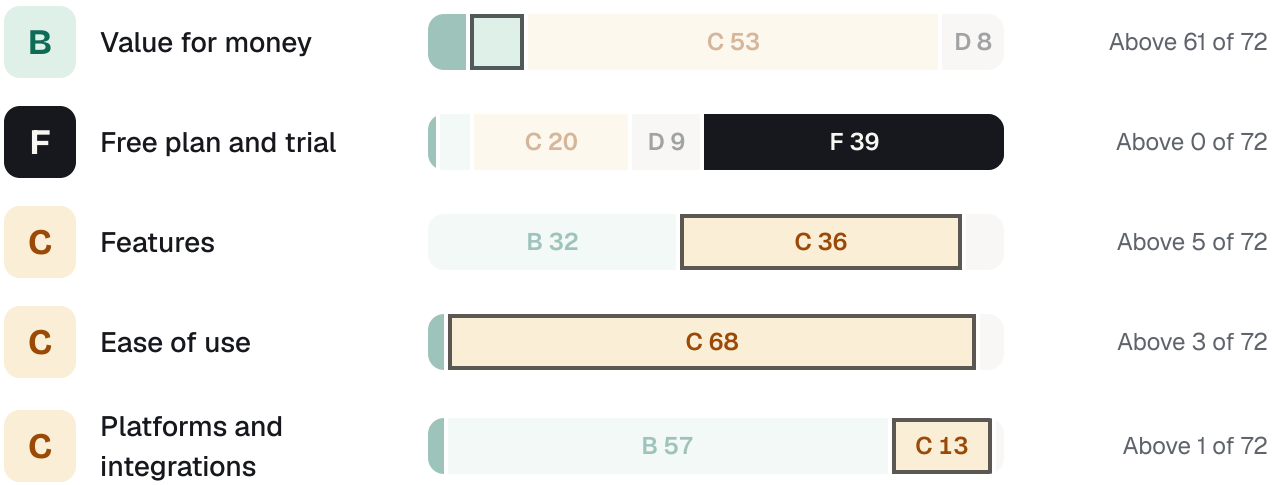

It stands best on value for money (B, above 61 of 72) and worst on free plan and trial (F, above 0).

Its paid plans start at $39 a month, against a middle price of $91 for the category: 8 of the 42 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 9 tools score higher and cost less.

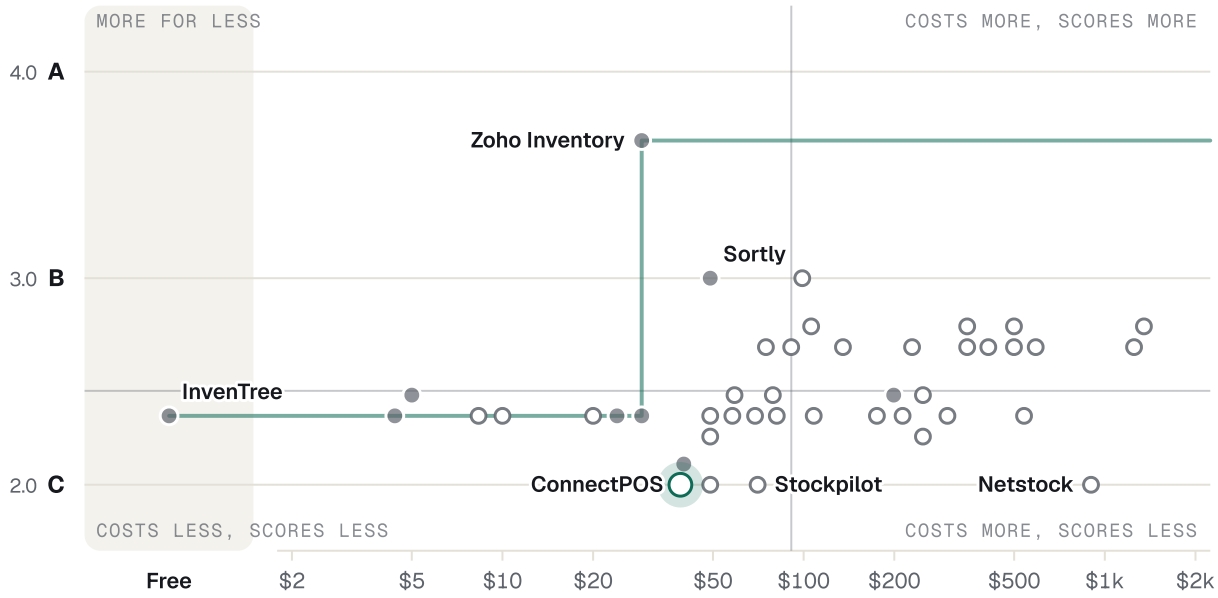

Each grade against the category

Every bar is all 73 inventory management tools we grade, cut by the letter each got. ConnectPOS's own letter is outlined.

Price against what you get

Each dot is one of 44 inventory management tools. Further left costs less; higher up scores better on features, ease of use and platforms. ConnectPOS is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of ConnectPOS you could make: inventory and reports. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 45 of the 72 other inventory management tools grade higher. It costs $468 a year.

What you could make

- Inventory and reports: an app builder makes these well.

What you could not

- Scanning barcodes with a phone camera or a scanner.

- Connections that pull numbers from dozens of other services.
- It plugs into other products, Shopify, Magento and BigCommerce among them.

What this rests on. ConnectPOS's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Thrive by Shopventory, Loyverse, Linnworks, Brightpearl and Cin7

The 5 tools ConnectPOS is most often weighed against, with where each one differs from it.

2.0 GPA
