Convertri is a hosted builder for landing pages, sales funnels, opt-in forms, carts and upsells, with a membership feature and sub-accounts for agencies. Published pages are served separately from the app so they stay live if the editor is down. It sells three plans, Convert, Scale and Maximize.

To get you started, here are **8 things to know about Convertri**, taken from its own pages and our grades.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Convertri you would be making a builder that other people can use without writing code. That is not a weekend's work, with an AI app builder or without one.

What you could make

- Templates and online courses: an app builder makes these well.

What you could not

- A builder that other people can use without writing code.
- Splitting visitors between versions and telling you which won.

What this rests on. Convertri's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
