Features	B	Multi-camera editing, motion tracking, speech-to-text subtitles and 360-degree editing cover the whole job.
Ease of use	C	No store rating on record, and a full timeline editor has a learning curve.

Who Corel VideoStudio is for

- ✓ Fits if you edit on a Windows PC and want multi-camera and tracking tools
- ✓ Makes sense if you prefer to pay once rather than subscribe

Who it is not for

- ✗ Skip it if you use a Mac, as the site lists Windows only
- ✗ Watch out: the product pages still show 2023 versions and copyright notices, so check what is on sale
- ✗ Watch out: some purchase options are upgrades that need an earlier licensed copy
- ✗ Skip it if you want a clear price, as none could be read in dollars

Good to know

Good for

- ✓ Home movies and event videos edited on a Windows PC
- ✓ Multi-angle footage from several cameras
- ✓ People who prefer owning a version of the software

Worth knowing

- ⓘ The vendor's pricing could not be read in US dollars: its page loaded prices in Malaysian ringgit with a Black Friday discount, so no price is recorded.
- ⓘ The product pages still describe the 2023 versions and show 2023 copyright notices, so check which version is on sale.
- ⓘ Windows 11, 10 and 8, 64-bit only; the site lists no Mac version.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

14/133

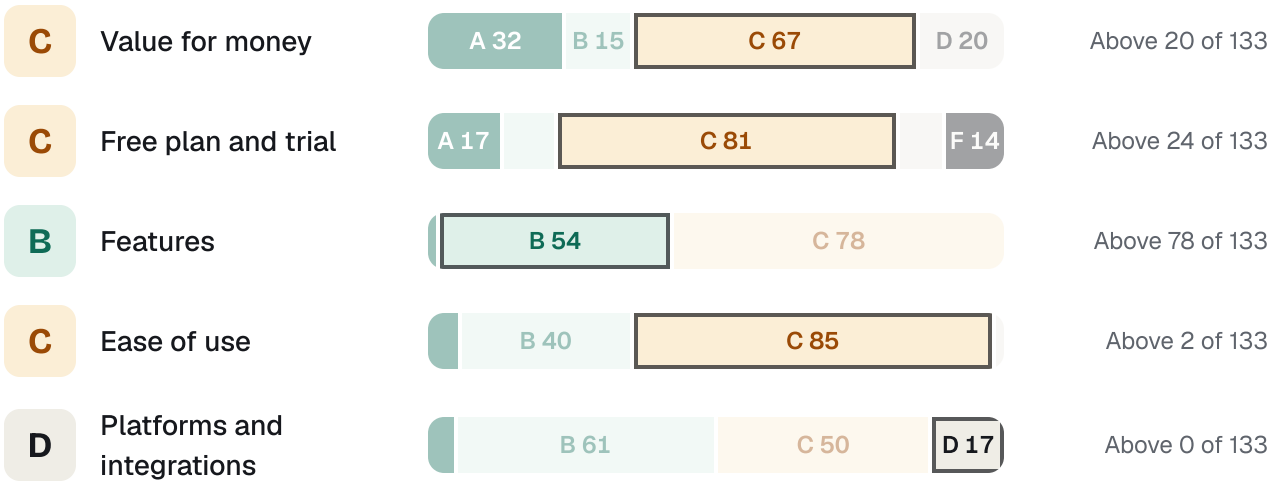

Other screen recording and video tools it is graded above

Corel VideoStudio's GPA of 2.0 is higher than 14 of the 133 other screen recording and video tools we grade, and level with 27.

It stands best on features (B, above 78 of 133) and worst on platforms and integrations (D, above 0).

Each grade against the category

Every bar is all 134 screen recording and video tools we grade, cut by the letter each got. Corel VideoStudio's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Corel VideoStudio you would be making a video editor. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 92 of the 133 other screen recording and video tools grade higher.

What you could make

- Templates: an app builder makes this well.

What you could not

- A video editor.
- Recording the screen with its sound, and somewhere to keep the video.
- Speech turned into text you can trust.
- A real app for Windows. Something home-made would be a web page.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Corel VideoStudio's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
