Keep it

To replace Criteria Corp you would be making video calls. That is not a weekend's work, with an AI app builder or without one.

What you could make

- Applicant tracking: an app builder makes this well.

What you could not

- Video calls.
- A library of tested questions with scores to compare candidates by.
- AI features, unless you pay a model provider for each request yourself.
- What a company asks for before it lets staff use something: single sign-on.

What this rests on. Criteria Corp's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
