Where it stands

Its grades against its category, and whether to keep it or make your own

14/133

Other screen recording and video tools it is graded above

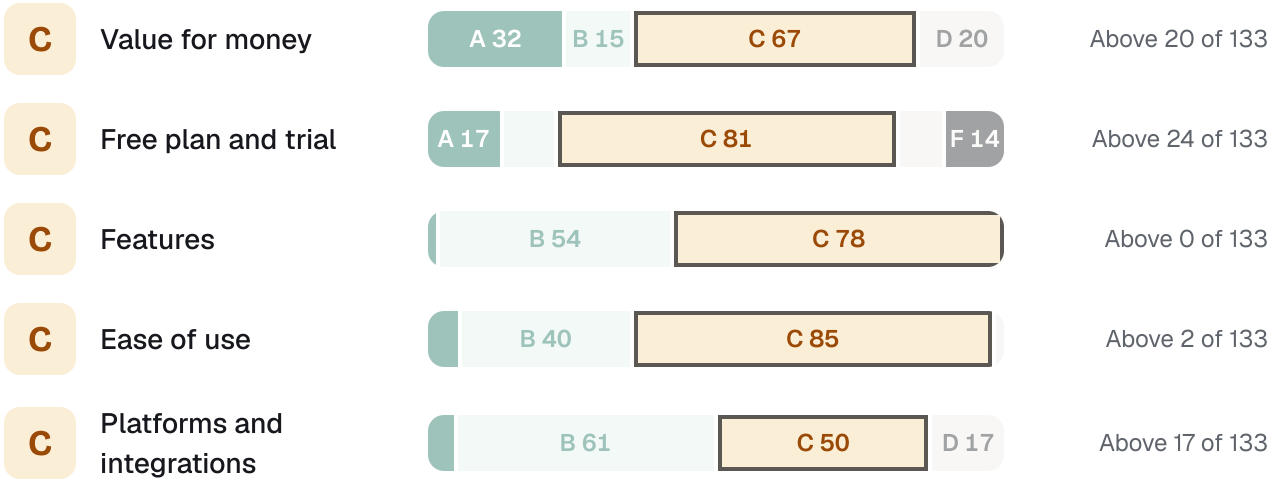

DeepBrain AI Studios's GPA of 2.0 is higher than 14 of the 133 other screen recording and video tools we grade, and level with 27.

Its paid plans start at $24 a month, against a middle price of $12.25 for the category: 72 of the 88 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 59 tools score higher and cost less.

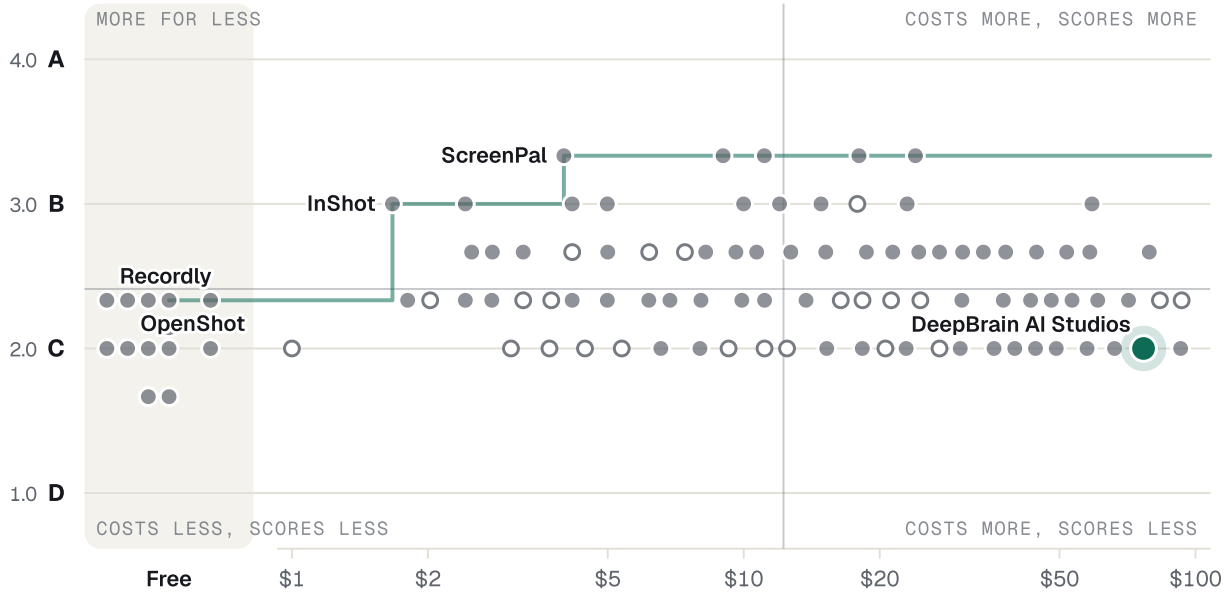

Each grade against the category

Every bar is all 134 screen recording and video tools we grade, cut by the letter each got. DeepBrain AI Studios's own letter is outlined.

Price against what you get

Each dot is one of 102 screen recording and video tools. Further left costs less; higher up scores better on features, ease of use and platforms. DeepBrain AI Studios is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace DeepBrain AI Studios you would be making a video model, which you can rent by the second but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 92 of the 133 other screen recording and video tools grade higher. It costs $288 a year.

What you could make

- Templates: an app builder makes this well.

What you could not

- A video model, which you can rent by the second but not make.

- A voice model, which you can rent by the minute but not make.
- A voice model trained on your recordings.
- A video editor.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. DeepBrain AI Studios's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
