Where it stands

Its grades against its category, and whether to keep it or make your own

8/63

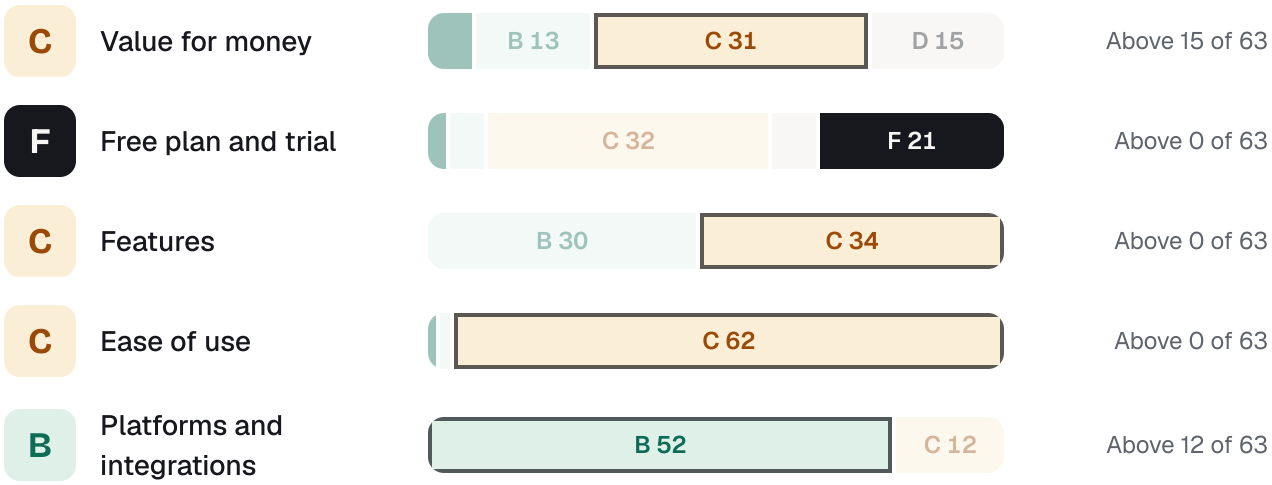

Other customer review tools it is graded above

Demandforce's GPA of 1.8 is higher than 8 of the 63 other customer review tools we grade, and level with 8.

It stands best on platforms and integrations (B, above 12 of 63) and worst on free plan and trial (F, above 0).

Every bar is all 64 customer review tools we grade, cut by the letter each got. Demandforce's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Demandforce you would be making newsletters sent to thousands of people that still reach the inbox. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 47 of the 63 other customer review tools grade higher.

What you could make

- Review collection and appointment booking: an app builder makes these well.

What you could not

- Newsletters sent to thousands of people that still reach the inbox.
- Phone numbers and calls carried over the phone network.
- Phone numbers that change for each visitor so every call is traced to its source.
- Texts from a business number, registered with the carriers.
- A real app for iOS and Android. Something home-made would be a web page.

What this rests on. Demandforce's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
