Detail is an app for recording video podcasts, presentations and reaction videos, then editing them automatically with silence removal, zoom cuts, captions and music. It comes as an iOS app and a separate macOS app, each with its own subscription. It is made by Detail Technologies B.V.

To get you started, here are **9 things to know about Detail**, taken from its own pages and our grades.

That is against the other screen recording and video tools we grade, on value, the free plan, features, ease of use and platforms.

Who Detail is for

- ✓ Fits if you record talking videos on an iPhone or Mac
- ✓ Works for people who want a teleprompter and captions in one app

Who it is not for

- ✗ Skip it if you use Windows or Android, as only iOS and Mac are listed
- ✗ Tight if you stay free, as exports are watermarked and caption styles limited to 3
- ✗ Watch out: iOS and macOS subscriptions are separate, so Pro on one does not unlock the other
- ✗ Watch out: the page showed euro prices, and its dollar figures could not be read

Good to know

Good for

- ✓ Creators who shoot and edit video entirely on an iPhone or iPad
- ✓ Podcasters recording video episodes with a remote guest
- ✓ People making short talking-head or reaction clips

Worth knowing

- ⓘ The iOS and macOS apps have separate subscriptions; a Pro plan on one does not unlock the other.
- ⓘ The pricing page showed euro prices from here; a dollar toggle exists but its figures were not readable.
- ⓘ There is no Windows, Android or full web editor listed on the site.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Detail you would be making a video editor. That is not a weekend's work, with an AI app builder or without one.

It costs $78.16 a year.

What you could not

- ✕ A video editor.
- ✕ Speech turned into text you can trust.
- ✕ Apps for macOS and iOS that stay in step with each other.

- ✕ AI features, unless you pay a model provider for each request yourself.
- ✕ Sharing with other people, which means accounts and invitations.

What this rests on. Detail's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
