Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 1 of the 85 other remote desktop apps we grade

Dizzion sells cloud-hosted digital workspaces: cloud PCs, app streaming, multi-session desktops and desktops as a service. Its DaaS runs on AWS, Expedient, Google Cloud or IBM Cloud, and managed services for patching and capacity are available. Prices are not published; buyers book a demo and can pay through prepaid Flex Credits.

To get you started, here are **7 things to know about Dizzion**, taken from its own pages and our grades.

> **No price or trial is published, and the pages we read name no desktop or phone client apps.**
>
> From our report card of Dizzion

1 **Best for cloud desktops run for you by a provider**

Dizzion sells managed cloud desktops, app streaming and DaaS to businesses, with a provider running the setup.

2 **It runs on Web**

Web.

3 **Cloud PC and DaaS**

Managed cloud desktops on a private or public cloud, with workload configurations that include GPU.

4 **App streaming and multi-session**

Separate offerings for streaming individual apps and for hosting several user sessions on shared desktops.

5 **Flex Credits**

A prepaid, consumption-based way to buy cloud desktop capacity, managed from a single wallet.

6 **A 1.6 GPA, above 1 of 85**

That is against the other remote desktop apps we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Dizzion you would be making a fast, secure link to another computer through any network. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for cloud desktops run for you by a provider

Dizzion sells managed cloud desktops, app streaming and DaaS to businesses, with a provider running the setup. No price or trial is published,

and the pages we read name no desktop or phone client apps.

TOOLGPA REPORT CARD	Dizzion	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	C	No price is published; the site points to demos and contact forms, so it can't be set against the category. It sells Flex Credits, but the page we read gives no rates.
Free plan and trial	F	Nothing free and no trial on record, only a sales conversation.
Features	C	Cloud PC, app streaming, multi-session desktops and managed services. The compliance statements are the vendor's own claims.
Ease of use	C	No store rating on record, and a managed rollout means working with the provider before anyone logs in.
Platforms and integrations	C	Web only on the listing; no desktop or mobile client apps are named, so supported devices are not confirmed.
Grade point average		Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Dizzion is for

- ✓ Fits if you want a provider to run your cloud desktops for you
- ✓ Works for regulated companies that need the compliance claims listed

Who it is not for

- ✕ Not for you if you are one person, since it is sold to businesses
- ✕ Skip it if you need a price up front, as the site gives demos and forms only
- ✕ Watch out: the compliance readiness statements are the vendor's own, not independent findings
- ✕ Watch out: no client apps are named, so check which devices work before buying

Good to know

Good for

- ✓ Organizations that want a provider to run their cloud desktops for them
- ✓ Companies in regulated industries that need the compliance claims listed

Worth knowing

- ⓘ No prices are published; the site points to demos and contact forms.
- ⓘ The compliance readiness statements are the vendor's own claims from its pages.
- ⓘ The pages read name no desktop or mobile client apps, so supported devices are not confirmed.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Dizzion's current pricing could not be confirmed from its own site.

> **No price is published; the site points to demos and contact forms, so it can't be set against the category.**

Where it stands

Its grades against its category, and whether to keep it or make your own

1/85

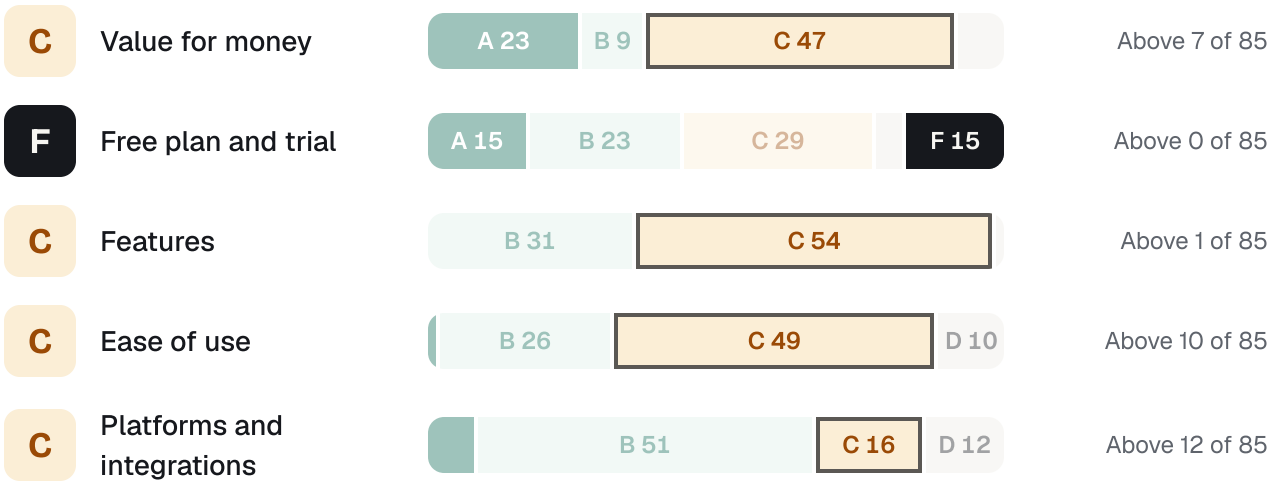

Other remote desktop apps it is graded above

Dizzion's GPA of 1.6 is higher than 1 of the 85 other remote desktop apps we grade, and level with 4.

It stands best on platforms and integrations (C, above 12 of 85) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 86 remote desktop apps we grade, cut by the letter each got. Dizzion's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Dizzion you would be making a fast, secure link to another computer through any network. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 80 of the 85 other remote desktop apps grade higher.

What you could not

- A fast, secure link to another computer through any network.
- Connections to other products, each kept working as those products change.
- What a company asks for before it lets staff use something: SOC 2 and HIPAA.

What this rests on. Dizzion's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
