# Welcome

What it is, who it suits, its grades and the ten things to know first

**2.2**

GPA, above 23 of the 61 other email verification and deliverability tools we grade

DMARCTrust processes DMARC aggregate reports and shows which sources send mail as a domain, with a verdict per sender and alerts when DNS records change. Higher plans add SPF flattening, hosted MTA-STS and TLS-RPT analytics. Pricing depends on the number of domains, with team seats included.

To get you started, here are **9 things to know about DMARCTrust**, taken from its own pages and our grades.

**1** **Best for DMARC reports priced by domain, not by email volume**

DMARCTrust prices by domain rather than by report volume, with a free plan for one domain.

**2** **Paid plans start at $15.83 a month**

As its pricing page puts it: $15.83 per month for 2 domains, billed annually ($19 billed monthly).

**3** **There is a free plan**

1 domain, 50 reports a month and 7-day data retention.

**4** **It runs on Web**

Web.

**5** **DMARC report analysis**

Aggregate reports are processed into pass/fail charts and a per-source view. Paid plans add a verdict for each sending source and failure reports (RUF).

**6** **DNS change alerts**

DNS records are checked and an alert is sent when they change. This is a Starter and Pro feature.

**7** **SPF optimizer**

The Pro plan flattens SPF records to keep them within the lookup limit.

**8** **A 2.2 GPA, above 23 of 61**

That is against the other email verification and deliverability tools we grade, on value, the free plan, features, ease of use and platforms.

**9** **Keep it**

The plain part of DMARCTrust you could make: reports. What surrounds it you could not. The 1 things listed below take a company, not a weekend.
