PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

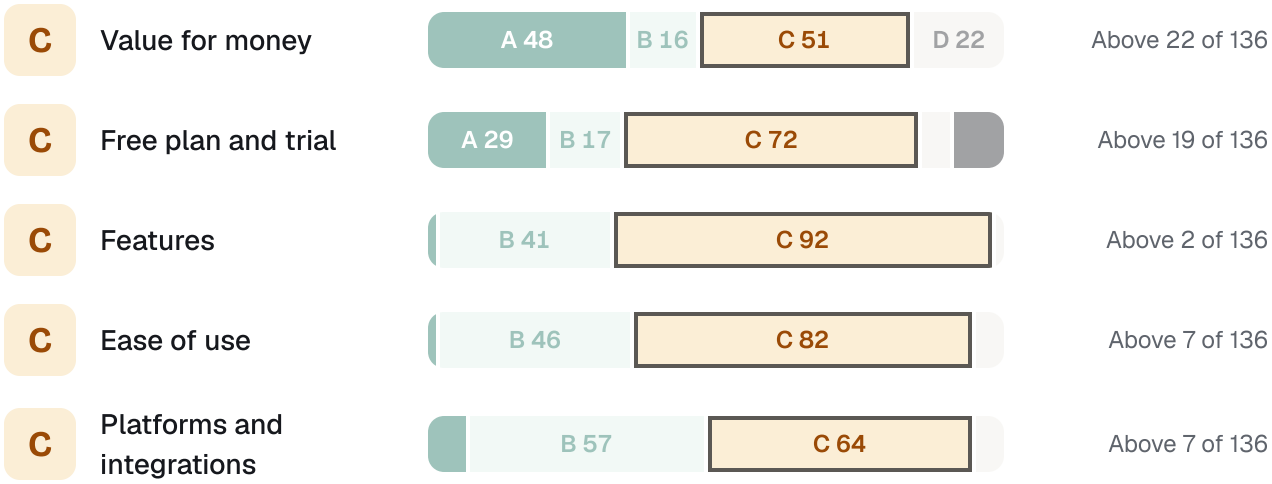

18/136

Other writing tools it is graded above

Draft2Digital's GPA of 2.0 is higher than 18 of the 136 other writing tools we grade, and level with 16.

Each grade against the category

Every bar is all 137 writing tools we grade, cut by the letter each got. Draft2Digital's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Draft2Digital you would be making printers that make and ship each order. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 102 of the 136 other writing tools grade higher.

What you could make

- Long-form writing, digital downloads and reports: an app builder makes these well.

What you could not

- × Printers that make and ship each order.
- × Sharing with other people, which means accounts and invitations.

What this rests on. Draft2Digital's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
