Dreamina is a web studio for generating images, video, audio and music from prompts. It runs ByteDance's Seedream image and Seedance video models and adds a canvas, an AI agent and editing tools such as upscaling and relighting. New accounts get free credits, and paid plans are sold by monthly credits.

To get you started, here are **8 things to know about Dreamina**, taken from its own pages and our grades.

Graded Nov 12, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No plan prices could be read: the pricing view needs a sign-in. The homepage's 'plans from just $0.29' looks like a first-month offer.
Free plan and trial	C	Sign-up credits, up to 380 on the homepage, plus free credits each day. The caps are not stated, and credit cost varies by model and resolution.
Features	B	Seedream and Seedance models, a canvas and agent, video editing, creative upscaling to 8K, 3D controls, audio and avatars. Nothing in the listing is missing from the job.

Grade point average		Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Keep it

To replace Dreamina you would be making an image model, which you can rent by the picture but not make. That is not a weekend's work, with an AI app builder or without one.

What you could not

- An image model, which you can rent by the picture but not make.
- A video model, which you can rent by the second but not make.
- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Dreamina's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
