Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 0 of the 70 other print-on-demand and dropshipping services we grade

Dropified is a dropshipping platform that bundles product research, an AI store builder, ad and content generation and automatic order handling in one subscription. It imports products from supplier marketplaces into a store, and the site says it can also source products and fulfill from its own warehouses. A single plan includes one store with unlimited products.

To get you started, here are **9 things to know about Dropified**, taken from its own pages and our grades.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Dropified you would be making suppliers who ship each order for you. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 67 of the 70 other print-on-demand and dropshipping services grade higher. It costs $499.92 a year.

What you could not

- ✕ Suppliers who ship each order for you.

- ✕ Checkout, card payments and sales tax handled for you.
- ✕ Ad images and videos made to each network's sizes.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Dropified's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
