# Welcome

What it is, who it suits, its grades and the ten things to know first

**2.0**

GPA, above 10 of the 89 other AI app builders we grade

Dualite is an AI builder that generates web and mobile apps, SEO pages and dashboards from chat messages. The pricing page lists Figma-to-code, a backend database, social login, GitHub import and code download, and says it runs OpenAI, Anthropic and Google models. Plans are sold by message allowance, and the company also offers fixed-price build work with its experts.

> **A browser app where you build by chatting.**
>
> From our grade for ease of use

To get you started, here are **9 things to know about Dualite**, taken from its own pages and our grades.

**1** **Best for web and mobile apps from chat, with Figma import**

Dualite builds web and mobile apps from chat messages, with Figma and GitHub import and a backend.

**2** **Paid plans start at $29 a month**

As its pricing page puts it: $29 per month for 200 messages (Pro).

**3** **There is a free plan**

Starter plan at $0 with 5 messages; the page does not say whether that allowance refills.

**4** **It runs on Web**

Web.

**5** **Web and mobile apps**

Builds iOS and Android apps, SEO-optimised pages and responsive dashboards from chat prompts.

**6** **Figma and GitHub import**

Figma-to-code and upload of existing GitHub projects are listed on the plan comparison.

**7** **Backend and login**

A backend database and one-click Google and social media login are listed among the features.

**8** **A 2.0 GPA, above 10 of 89**

That is against the other AI app builders we grade, on value, the free plan, features, ease of use and platforms.

**9** **Keep it**

To replace Dualite you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

## The report card

### Best for web and mobile apps from chat, with Figma import

Dualite builds web and mobile apps from chat messages, with Figma and GitHub import and a backend. Starter gives 5 messages and the page does not say if they renew, and the plan table lists the same features on every plan, so it does not show what paying adds beyond message counts.

TOOLGPA REPORT CARD

**Dualite**

Graded Nov 13, 2026

| SUBJECT | GRADE | COMMENT |
|---|---|---|
| **Value for money** | C | Pro is $29 a month for 200 messages, in the dearer quarter but under the $32 where the dearest tenth starts. Launch is $79 for unlimited messages. |
| **Free plan and trial** | C | Starter at $0 gives 5 messages, and the page does not say whether they refill. That is a taste, not a plan. |
| **Features** | C | Web and mobile apps, Figma and GitHub import, backend, social login and your own keys. The plan table does not show what each plan includes beyond messages, so the listing cannot say what is missing. |
| **Ease of use** | C | A browser app where you build by chatting. No store rating on record. |
| **Platforms and integrations** | C | Web only, with Figma and GitHub import. Model providers are named, but they are not integrations. |

**Grade point average** Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

### Who Dualite is for

- ✓ Fits if you want to turn a Figma design into code and keep it in GitHub
- ✓ Works for people who want mobile and web apps from the same chat

### Who it is not for

- ✗ Tight if you stay free: 5 messages, and the page does not say if they renew
- ✗ Pricey if you build a lot: Pro stops at 200 messages a month, and unlimited is $79
- ✗ Watch out: the annual prices could not be read, so the monthly ones are what we have
- ✗ Watch out: the plan table shows the same features everywhere, so what paying unlocks is unclear

## Good to know

### Good for

- ✓ Non-coders who want an app, a dashboard or an SEO page from prompts
- ✓ Designers moving Figma files into working code
- ✓ Teams that want expert help turning an AI prototype into a product

### Worth knowing

- ⓘ The Starter plan lists only 5 messages, and the page does not say how often they renew.
- ⓘ Pro is capped at 200 messages a month; additional credits can be bought.
- ⓘ The page offers an annual toggle with up to 20% off, but the annual prices were not readable, so monthly figures are recorded.
- ⓘ The plan table lists the same features on every plan, with no visible mark for which ones the free plan lacks.

PART 04 · STANDING

# Where it stands

Its grades against its category, and whether to keep it or make your own

**10**/89

Other AI app builders it is graded above

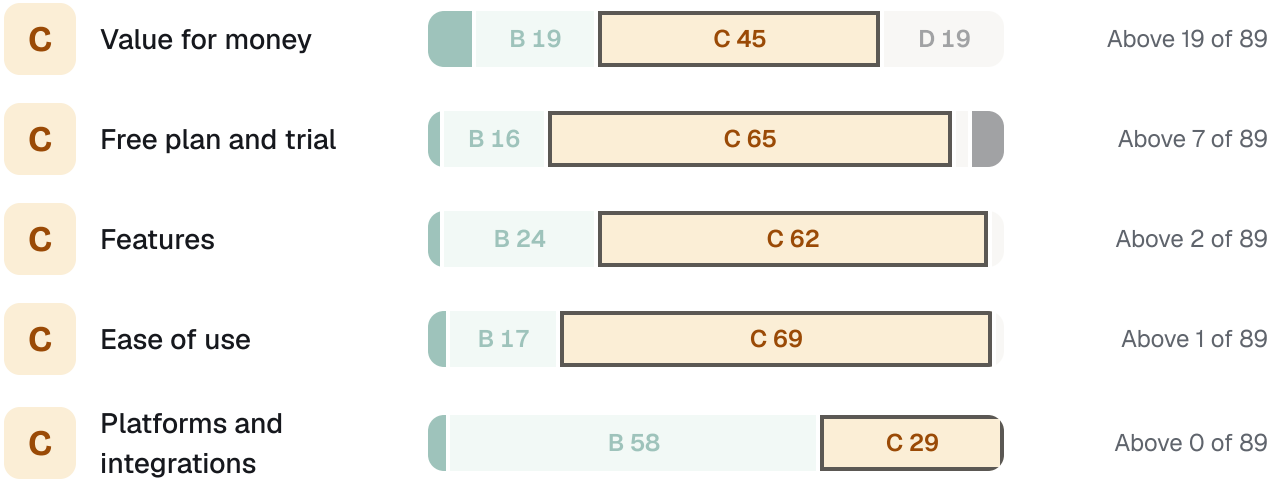

Dualite's GPA of 2.0 is higher than 10 of the 89 other AI app builders we grade, and level with 12.

Its paid plans start at $29 a month, against a middle price of $20 for the category: 68 of the 82 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 51 tools score higher and cost less.

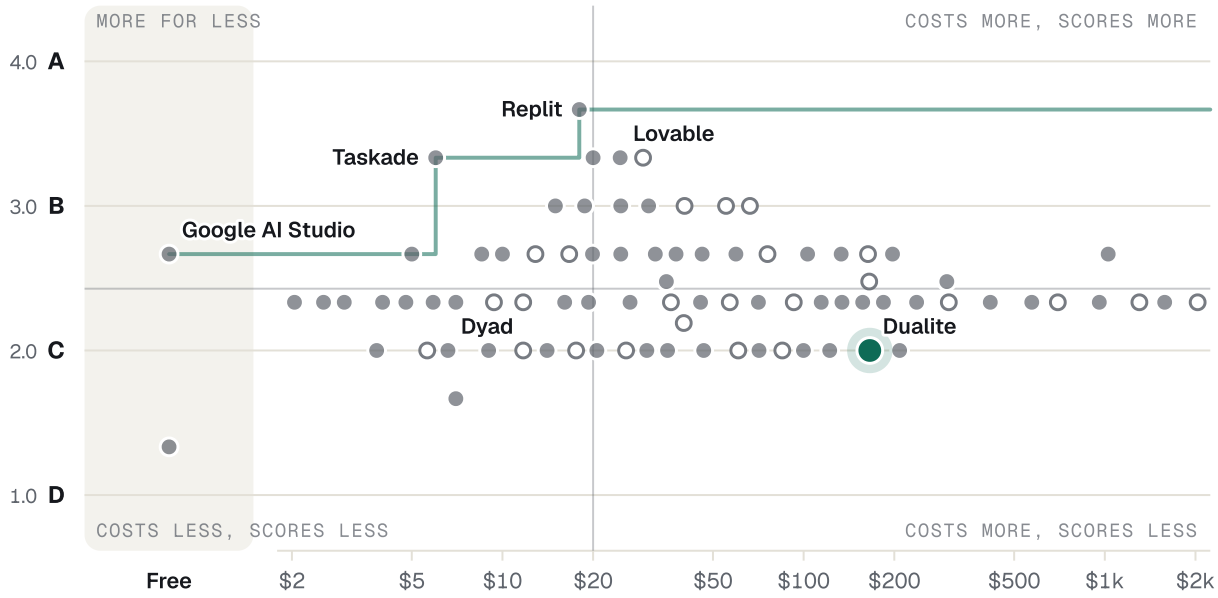

## Each grade against the category

Every bar is all 90 AI app builders we grade, cut by the letter each got. Dualite's own letter is outlined.

## Price against what you get

Each dot is one of 85 AI app builders. Further left costs less; higher up scores better on features, ease of use and platforms. Dualite is the marked dot.

What paid plans start at, a month (each step along is roughly double)

## Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

### Keep it

To replace Dualite you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 67 of the 89 other AI app builders grade higher. It costs $348 a year.

**What you could make**

- Templates: an app builder makes this well.

**What you could not**

- A tool that builds and hosts other apps.

- An AI agent, with the models and the safeguards behind it.
- Databases with views, filters and links between them.
- It plugs into other products, Figma, GitHub and OpenAI among them.

**What this rests on.** Dualite's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
