Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 106 of the 168 other AI image and video generators we grade

Dzine is a browser-based AI studio for images, video and lip-synced avatars. One credit balance pays for generation with models from other labs, such as Nano Banana, GPT Image, Seedream, Flux and Midjourney, alongside editing tools like a magic eraser, enhancer and style changer. A chat editor and a consistent-character feature are part of the toolset.

To get you started, here are **9 things to know about Dzine**, taken from its own pages and our grades.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Dzine you would be making an image model, which you can rent by the picture but not make. That is not a weekend's work, with an AI app builder or without one.

It costs $84 a year.

What you could not

- ✕ An image model, which you can rent by the picture but not make.
- ✕ A video model, which you can rent by the second but not make.

- ✕ Ad images and videos made to each network's sizes.
- ✕ An API that other software can build on.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Dzine's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
