Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 74 of the 127 other accounting and invoicing tools we grade

e-conomic is a browser-based accounting program for Danish businesses, sold in four packages. It covers bookkeeping, VAT returns, invoicing, orders and quotes, bank connections and accountant access, with a mobile app for invoices and receipts. Prices are in Danish kroner and follow the number of postings a company makes each year.

To get you started, here are **9 things to know about e-conomic**, taken from its own pages and our grades.

> **No store rating on record, and you set up your bank connection and chart of accounts first.**
>
> From our grade for ease of use

1 **Best for Danish bookkeeping shared with your accountant**

e-conomic does bookkeeping, VAT, invoicing and bank connection for Danish companies, with an open API.

2 **What it costs**

Paid plans start at 249 kr. per month excl. VAT, for 1,000 postings a year.

3 **You can try it first**

14-day free trial with no commitment

4 **It runs on 3 platforms**

Web, iOS and Android.

5 **Bookkeeping and VAT**

General ledger, VAT accounting, reports, year-end close, currency handling and e-invoicing are part of the core in every package.

6 **Bank connection**

Bank transactions flow into the books automatically; the page says it connects to all banks in Denmark, so no CSV imports are needed.

7 **Orders, quotes and reminders**

Send orders and quotes by email, PDF or online link, and keep track of customers who have not paid on time.

8 **A 2.4 GPA, above 74 of 127**

That is against the other accounting and invoicing tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace e-conomic you would be making live feeds from your bank, which take an agreement with each bank or a service that has them. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for Danish bookkeeping shared with your accountant

e-conomic does bookkeeping, VAT, invoicing and bank connection for Danish companies, with an open API. But the price climbs with your postings, the plan that adds orders and quotes costs more, time registration is a separate add-on, and it is all in kroner.

TOOLGPA REPORT CARD — **e-conomic** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	249 kr. a month excluding VAT for 1,000 postings, roughly in the upper part of what the category charges, and it rises automatically as you pass your postings limit.
Free plan and trial	C	A 14-day free trial with no commitment. There is no free plan.
Features	B	Bookkeeping, VAT returns, invoicing, bank connection and accountant access across all plans, plus an open API. The listing names add-ons but no hole in the core work.
Ease of use	C	No store rating on record, and you set up your bank connection and chart of accounts first.
Platforms and integrations	B	Web plus iOS and Android apps, with an open API and integrations. No desktop app.

Grade point average — Fair, out of 4.0 **2.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who e-conomic is for

- ✓ Fits if you run a Danish company with an accountant who logs in too
- ✓ Works for businesses that want an API into their own tools

Who it is not for

- ✕ Pricey if you post a lot: the price rises when you pass your postings limit
- ✕ Skip it if you need orders, quotes or reminders, because they sit on Plus at 299 kr. and above
- ✕ Watch out: extra users are an add-on, and only Komplet includes one
- ✕ Watch out: time registration is a separate add-on at 79 kr. a month
- ✕ Not for you if you want yearly billing discounts: the page lists none, and it is billed quarterly

Good to know

Good for

- ✓ Small Danish companies that want bank-connected bookkeeping
- ✓ Businesses that share their books with an outside accountant
- ✓ Companies with several locations or a holding structure (Komplet)

Worth knowing

- ⓘ Prices are in Danish kroner excluding VAT, and rise automatically when a company passes its postings limit.
- ⓘ Billed quarterly by invoice; the pricing page lists no yearly discount.
- ⓘ Extra users are an add-on; only Komplet includes one extra user.
- ⓘ Time registration is a separate add-on at 79 kr. a month, or 39 kr. for the mobile version.

Bookkeeping and VAT

General ledger, VAT accounting, reports, year-end close, currency handling and e-invoicing are part of the core in every package.

Bank connection

Bank transactions flow into the books automatically; the page says it connects to all banks in Denmark, so no CSV imports are needed.

Orders, quotes and reminders

Send orders and quotes by email, PDF or online link, and keep track of customers who have not paid on time.

Receipt matching and suggestions

Receipt matching, automatic reading of receipts and posting suggestions cut manual entry; some of these start at Smart.

Accountant access

An accountant or bookkeeper can be given direct access to the books at no extra charge.

Open API and integrations

An open API connects e-conomic to the rest of a company's systems; the vendor says more than 200 integrations exist.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

74/127

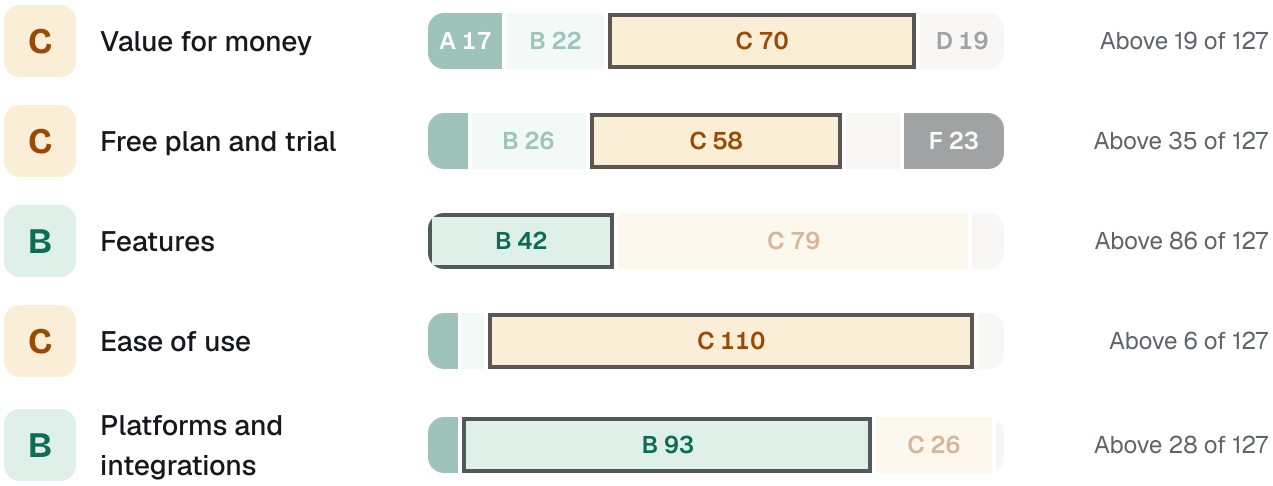

Other accounting and invoicing tools it is graded above

e-conomic's GPA of 2.4 is higher than 74 of the 127 other accounting and invoicing tools we grade, and level with 19.

It stands best on features (B, above 86 of 127) and worst on ease of use (C, above 6).

Each grade against the category

Every bar is all 128 accounting and invoicing tools we grade, cut by the letter each got. e-conomic's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace e-conomic you would be making live feeds from your bank, which take an agreement with each bank or a service that has them. That is not a weekend's work, with an AI app builder or without one.

What you could make

- Invoicing, reports and quotes and estimates: an app builder makes these well.

What you could not

- Live feeds from your bank, which take an agreement with each bank or a service that has them.
- A real app for iOS and Android. Something home-made would be a web page.
- An API that other software can build on.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. e-conomic's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
