Every bar is all 51 tools for selling digital products we grade, cut by the letter each got. E-junkie's own letter is outlined.

Price against what you get

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace E-junkie you would be making checkout, card payments and sales tax handled for you. That is not a weekend's work, with an AI app builder or without one.

It costs $96 a year.

What you could make

- Digital downloads: an app builder makes this well.

What you could not

- Checkout, card payments and sales tax handled for you.

- Discounted carrier rates and labels, which take an agreement with each carrier.
- Every click and sale traced back to the right partner.
- It plugs into other products, PayPal, Stripe and Braintree among them, and has an API.

What this rests on. E-junkie's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
