Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 12 of the 80 other shipping software we grade

EasyParcel is a delivery booking platform from Penang, Malaysia, operating in Malaysia, Singapore, Thailand and Indonesia. Senders compare quotes from many couriers, book domestic and international parcels, and connect stores and marketplaces. The company says no volume commitment is required.

To get you started, here are **7 things to know about EasyParcel**, taken from its own pages and our grades.

> **It publishes no price list, its rates show in ringgit through the quote tool, and each country has its own separate site.**
>
> From our report card of EasyParcel

1 **Best for courier quotes in Malaysia**

EasyParcel quotes couriers instantly and connects to stores such as Shopify, Shopee and Lazada, with cash on delivery and tracking tools.

2 **It runs on 3 platforms**

Web, iOS and Android.

3 **Instant courier quotes**

A quote tool compares domestic, international and on-demand rates from the courier partners within a minute.

4 **Store and marketplace integrations**

Integrations listed include Shopify, WooCommerce, Wix, eBay, Shopee, Lazada, TikTok Shop and EasyStore.

5 **Cash on delivery and protection**

Cash on delivery and EasyCover parcel protection, which the banner says covers valuable international parcels up to RM10,000.

6 **A 1.8 GPA, above 12 of 80**

That is against the other shipping software we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace EasyParcel you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

Features	C	Quotes, store integrations, cash on delivery, protection, tracking and an API. The listing shows no gap in the core work, but only through the Malaysia site that was read.
Ease of use	C	No store rating is on record. Store and marketplace connections must be set up.
Platforms and integrations	B	Web, iPhone and Android, with a list of integrations and an API, but no desktop app.

EasyParcel is made by EasyParcel Sdn Bhd, and has been around since 2014.

Where it stands

Its grades against its category, and whether to keep it or make your own

12/80

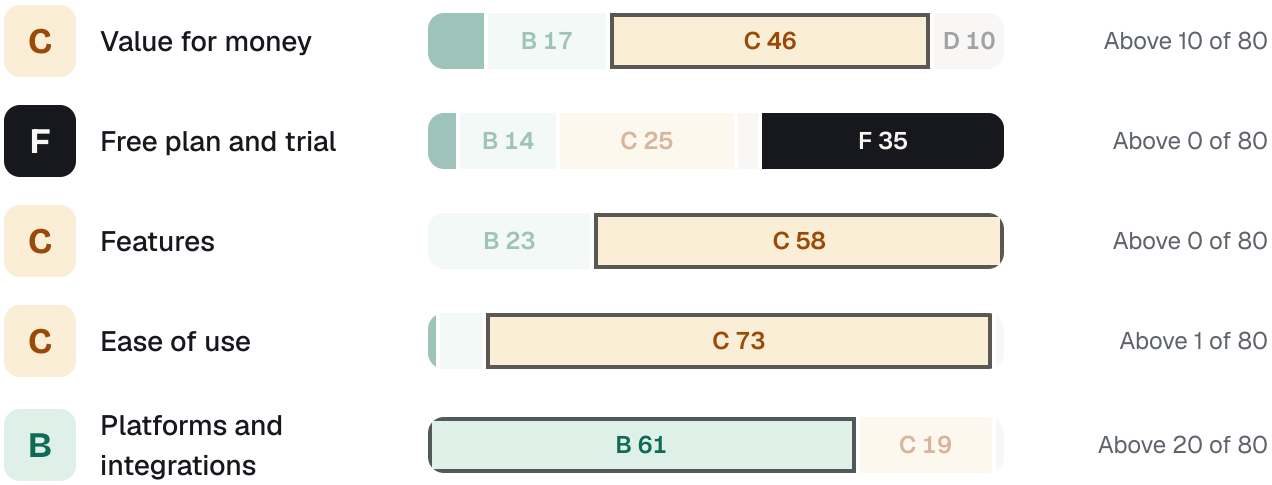

Other shipping software it is graded above

EasyParcel's GPA of 1.8 is higher than 12 of the 80 other shipping software we grade, and level with 18.

It stands best on platforms and integrations (B, above 20 of 80) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 81 shipping software we grade, cut by the letter each got. EasyParcel's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace EasyParcel you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 50 of the 80 other shipping software grade higher.

What you could not

- ✕ Discounted carrier rates and labels, which take an agreement with each carrier.
- ✕ Connections to other products, each kept working as those products change.
- ✕ A real app for iOS and Android. Something home-made would be a web page.

What this rests on. EasyParcel's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
