Where it stands

Its grades against its category, and whether to keep it or make your own

8/98

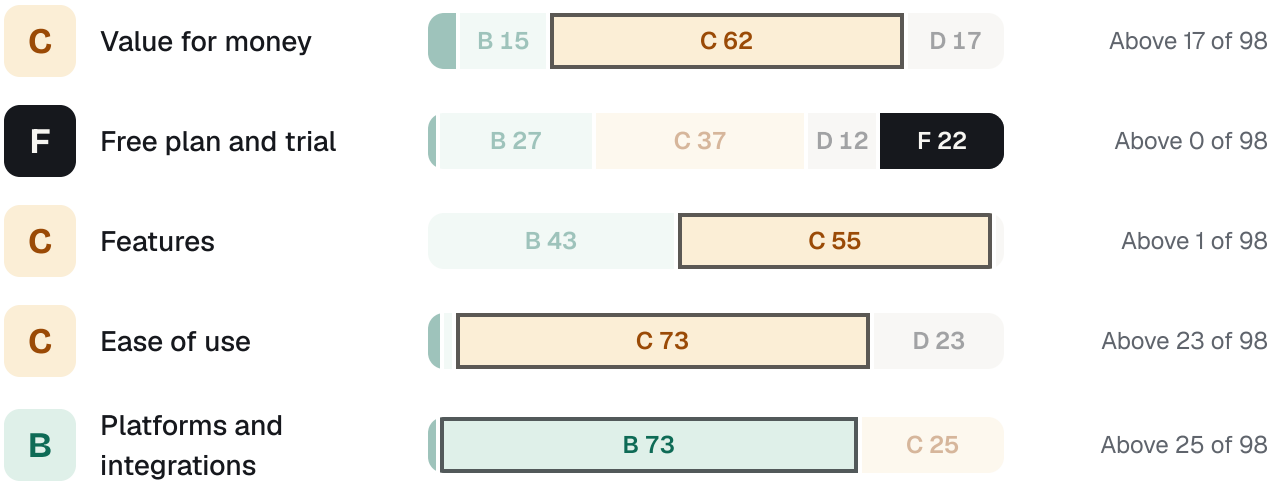

Other course and community platforms it is graded above

Eduzz's GPA of 1.8 is higher than 8 of the 98 other course and community platforms we grade, and level with 14.

It stands best on platforms and integrations (B, above 25 of 98) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 99 course and community platforms we grade, cut by the letter each got. Eduzz's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Eduzz you could make: online courses. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 76 of the 98 other course and community platforms grade higher.

What you could make

- Online courses: an app builder makes this well.

What you could not

- Selling tickets and checking them at the door.
- A real app for iOS and Android. Something home-made would be a web page.
- An API that other software can build on.

What this rests on. Eduzz's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
