Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Email on Acid's own pages, its app-store listings and our grades. Every fact in it is on Email on Acid's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 4 of the 61 other email verification and deliverability tools we grade

Email on Acid previews an email's HTML across 100+ clients and devices before it is sent. Higher plans add accessibility, link, image, code and spam-content checks. The vendor says current customers are moving to Mailgun Inspect, the next-generation product from Mailgun, and that the two are the same line of tools.

To get you started, here are **9 things to know about Email on Acid**, taken from its own pages and our grades.

> **Paste or send the email and read the results, with a migration to Mailgun Inspect under way.**
>
> From our grade for ease of use

1 **Best for previewing an email in many clients before a send**

Email on Acid shows your email across 100+ clients and devices, with unlimited users and an API.

2 **Paid plans start at $99 a month**

As its pricing page puts it: $99 per month.

3 **You can try it first**

Free trial offered; its length is not stated on the page

4 **It runs on Web**

Web.

5 **Client and device previews**

Each screenshot of a client or device counts as one preview, so a test across 50 clients uses 50 previews.

6 **Accessibility checks**

Premium tests are based on the W3C Web Content Accessibility Guidelines, which the vendor ties to the European Accessibility Act.

7 **Link and image validation**

Premium checks links and images in a message. The FAQ says these checks, unlike previews, are unlimited.

8 **A 1.8 GPA, above 4 of 61**

That is against the other email verification and deliverability tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Email on Acid you would be making newsletters sent to thousands of people that still reach the inbox. That is not a weekend's work, with an AI app builder or without one.

Email on Acid at a glance

OUR GRADE 1.8 GPA, weak	

The report card

Best for previewing an email in many clients before a send

Email on Acid shows your email across 100+ clients and devices, with unlimited users and an API. Accessibility, spam and link checks only start at Premium, and its pricing page says customers are moving to Mailgun Inspect from June 2026, with old previews not carried over.

TOOLGPA REPORT CARD — **Email on Acid** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	D	Basic is $99 a month for 1,000 previews, above the category's dearer quarter ($49). The checks most people want sit on Premium at $199.
Free plan and trial	D	A free trial is offered, but the page states no length.
Features	C	Previews, accessibility, link and image checks and spam analysis. It does not send email.
Ease of use	C	No rating on record. Paste or send the email and read the results, with a migration to Mailgun Inspect under way.
Platforms and integrations	B	Web, with an API and unlimited users on every plan and one listed integration.
Grade point average		Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Email on Acid is for

- ✓ Fits if you check each campaign across many email clients
- ✓ Works for agencies that need unlimited users on one account

Who it is not for

- ✗ Pricey if you add it up, at $99 a month for 1,000 previews
- ✗ Skip it if you want accessibility or spam checks on the cheap plan, as they start at Premium, $199
- ✗ Watch out: the pricing page says customers move to Mailgun Inspect from June 2026 and old tests are not carried over
- ✗ Watch out: it does not send email, so you need a separate sending service
- ✗ Watch out: the trial length is not stated

Good to know

Good for

- ✓ Email developers testing HTML across many clients
- ✓ Marketing teams that need pre-send QA with any email service provider
- ✓ Larger teams, since seats are unlimited

Worth knowing

- ⓘ The pricing page says current customers will move to Mailgun Inspect from June 2026, and that old previews and tests are not carried over.
- ⓘ Annual-plan customers migrate at the end of their current term.
- ⓘ Basic has no accessibility, spam or link checks; those start at Premium.
- ⓘ It does not send email; the FAQ says you need a separate sending service.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$99

A month to start

Email on Acid is a paid product with a free trial, starting at $99 per month.

> **A free trial is offered, but the page states no length.**
>
> From our grade for free plan and trial

BASIC

$99

per month for 1,000 previews

Unlimited users, 100+ preview clients and devices, API access; extra previews cost $0.15 each.

PREMIUM

$199

per month for 2,000 previews

Adds accessibility tests, HTML code analysis, link and image validation and spam content checks.

CONTRACT

Custom

Custom preview allotment with the Premium feature set and phone and chat support; sold through sales.

Trying it first

Free trial offered; its length is not stated on the page

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Email previews and pre-send QA, now moving to Mailgun Inspect. Here is what it does, as its own site describes it, and what it covers: public API, reports, email campaigns.

> **Previews, accessibility, link and image checks and spam analysis.**

From our grade for features

Client and device previews

Each screenshot of a client or device counts as one preview, so a test across 50 clients uses 50 previews.

Accessibility checks

Premium tests are based on the W3C Web Content Accessibility Guidelines, which the vendor ties to the European Accessibility Act.

Link and image validation

Premium checks links and images in a message. The FAQ says these checks, unlike previews, are unlimited.

Spam content analysis

Premium includes content spam checks and HTML code analysis, judged on the message itself and not on your sending reputation.

API access and unlimited users

Every plan includes API access, and none of the plans limit how many people on a team can use the account.

Where it runs

Web

What it works with

Mailgun

Email on Acid is made by Email on Acid.

Where it stands

Its grades against its category, and whether to keep it or make your own

4/61

Other email verification and deliverability tools it is graded above

Email on Acid's GPA of 1.8 is higher than 4 of the 61 other email verification and deliverability tools we grade, and level with 3.

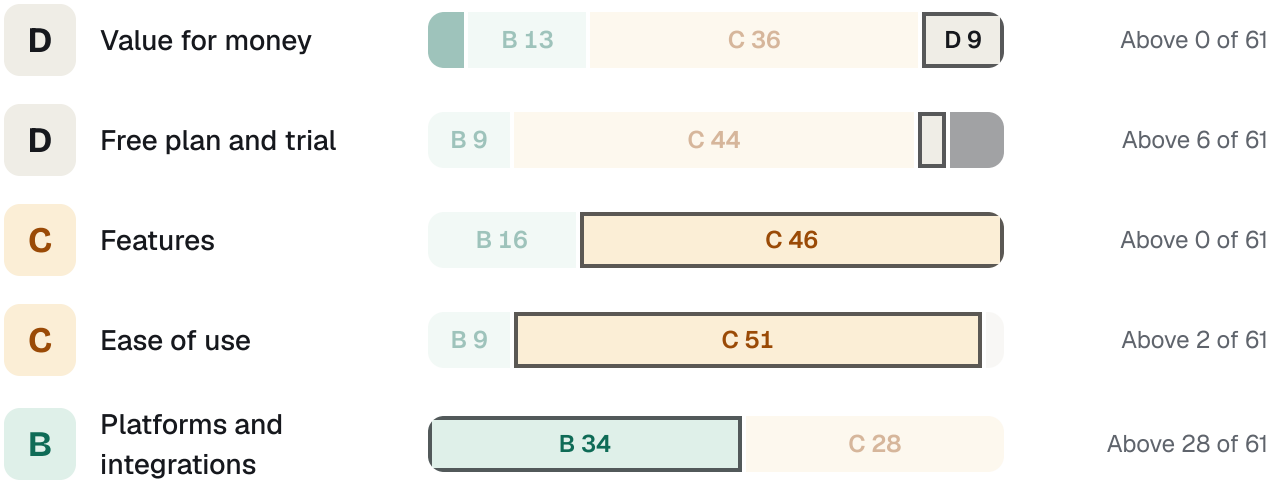

It stands best on platforms and integrations (B, above 28 of 61) and worst on value for money (D, above 0).

Its paid plans start at $99 a month, against a middle price of $21.50 for the category: 38 of the 43 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 8 tools score higher and cost less.

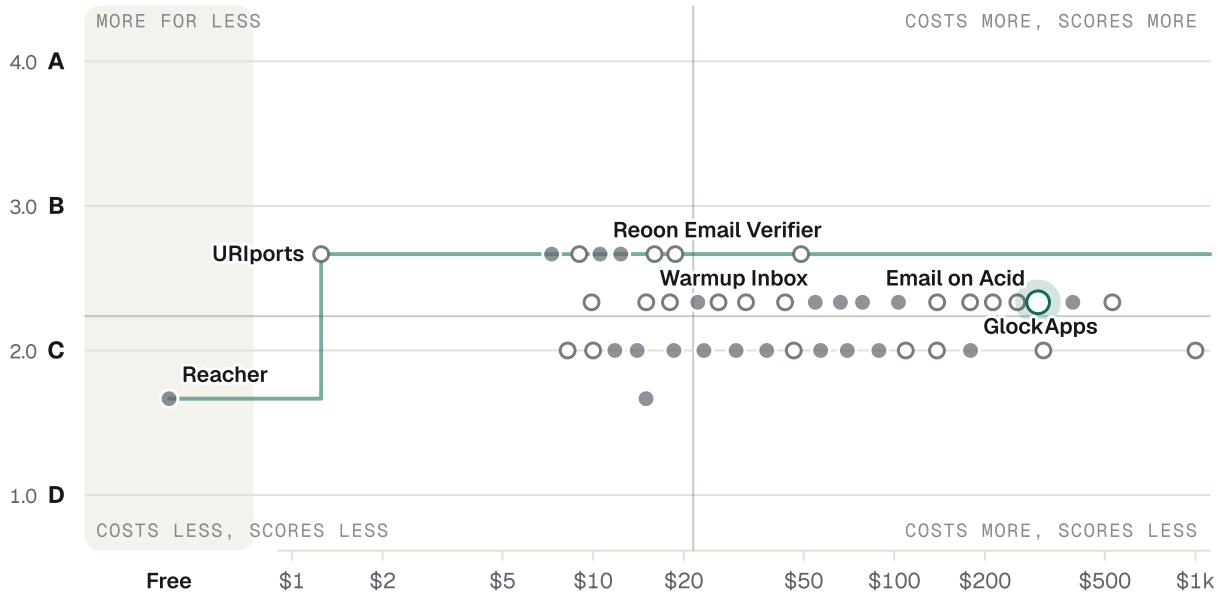

Each grade against the category

Every bar is all 62 email verification and deliverability tools we grade, cut by the letter each got. Email on Acid's own letter is outlined.

Price against what you get

Each dot is one of 45 email verification and deliverability tools. Further left costs less; higher up scores better on features, ease of use and platforms. Email on Acid is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Email on Acid you would be making newsletters sent to thousands of people that still reach the inbox. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 54 of the 61 other email verification and deliverability tools grade higher. It costs $1,188 a year.

What you could make

- Reports: an app builder makes this well.

What you could not

- Newsletters sent to thousands of people that still reach the inbox.
- It plugs into other products, Mailgun among them, and has an API.

What this rests on. Email on Acid's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Inbox Monster, GlockApps, MailGenius, Mail-Tester and Validity Engage
