Keep it

It is one of the better ones too: its GPA of 2.6 is higher than 54 of the 61 other email verification and deliverability tools we grade. It costs $192 a year.

What you could not

- ✕ Checking that an address exists without writing to it.
- ✕ It plugs into other products, Mailchimp, AWeber and MailerLite among them, and has an API.

- The depth: we grade its features B, which means it covers the whole job.

What this rests on. EmailListVerify's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
