Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Enalyzer you could make: surveys, forms and reports. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 147 of the 148 other form and survey tools grade higher. It costs $1,726.07 a year.

What you could make

- Surveys, forms and reports: an app builder makes these well.

What you could not

- Connections that pull numbers from dozens of other services.

- ✕ It is priced for each person, which means accounts and billing for a team.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Enalyzer's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
