Welcome

What it is, who it suits, its grades and the ten things to know first

2.6

GPA, above 34 of the 49 other lead and email finders we grade

Enrow finds and verifies professional emails and direct mobile numbers from a name, company or LinkedIn URL. It also checks lists of existing addresses. One credit pool covers the email finder, phone finder and verifier, and credits are spent only on verified results. Plans have no per-seat fees, and the site lists a Chrome extension, an API and an MCP server.

To get you started, here are **9 things to know about Enrow**, taken from its own pages and our grades.

>
> **Credits, bulk uploads and an API to get your head around.**
>
> From our grade for ease of use

1 **Best for cheap email lookups by the result**

Enrow finds and verifies emails and phones and bills only for results, from $17 a month for 1,000 credits.

2 **Paid plans start at $17 a month**

As its pricing page puts it: $17 per month for 1,000 credits, billed monthly.

3 **You can try it first**

50 free credits on signup, no credit card needed.

4 **It runs on Web**

Web, with a browser extension too.

5 **Email finder**

Takes a name and company, or a LinkedIn profile URL, and returns a verified work email. It costs 1 credit per email found, and the site says catch-all addresses are verified too.

6 **Phone finder**

Returns direct mobile numbers rather than landlines or switchboards. A number found costs 40 credits.

7 **Email verifier**

Checks addresses you already have for 0.25 credits each, so invalid ones can be dropped before a send.

8 **A 2.6 GPA, above 34 of 49**

That is against the other lead and email finders we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

The plain part of Enrow you could make: web clipper. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

The report card

Best for cheap email lookups by the result

Enrow finds and verifies emails and phones and bills only for results, from $17 a month for 1,000 credits. A phone costs 40 credits, though, so the cheapest plan buys about 25 numbers.

TOOLGPA REPORT CARD **Enrow** Graded Nov 12, 2026

SUBJECT	GRADE	COMMENT
Value for money	A	$17 a month for 1,000 credits, under 60% of the $33.25 cheaper quarter for lead-finding tools. Pro is $87 for 10,000.
Free plan and trial	C	50 free credits on sign-up, no card needed, and no free plan after that.
Features	C	Email finder, phone finder and verifier, single, bulk and extension, plus CRM, API and MCP. Phones are expensive in credits.
Ease of use	C	No store rating on record. Credits, bulk uploads and an API to get your head around.
Platforms and integrations	B	Web and a Chrome extension, with seven integrations, an API and MCP.

Grade point average Good, out of 4.0 **2.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Enrow is for

- ✓ Fits if you mostly need emails at a low per-email price
- ✓ Works for people who want to pay only when a result is found

Who it is not for

- ✕ Tight if you need phones: 40 credits each, so Start buys about 25 numbers
- ✕ Skip it if you want a free plan, since you get 50 sign-up credits and that's it
- ✕ Watch out: Start credits don't roll over, and unused credits expire if you cancel
- ✕ Watch out: a LinkedIn-URL search that finds nothing still costs 0.25 credits, and the annual prices weren't shown

Good to know

Good for

- ✓ Teams that want to pay per verified result instead of per search
- ✓ Small groups that need several users without per-seat fees
- ✓ Teams that look up emails more than phone numbers

Worth knowing

- ⓘ Phones cost 40 credits each, so Start's 1,000 credits cover about 25 numbers.
- ⓘ The page shows monthly prices by default; an annual option is labeled 40% off but its prices were not shown.
- ⓘ Start does not roll over credits, and unused subscription credits expire if you cancel.
- ⓘ An email search from a LinkedIn URL that finds nothing costs 0.25 credits.

Where it stands

Its grades against its category, and whether to keep it or make your own

34/49

Other lead and email finders it is graded above

Enrow's GPA of 2.6 is higher than 34 of the 49 other lead and email finders we grade, and level with 7.

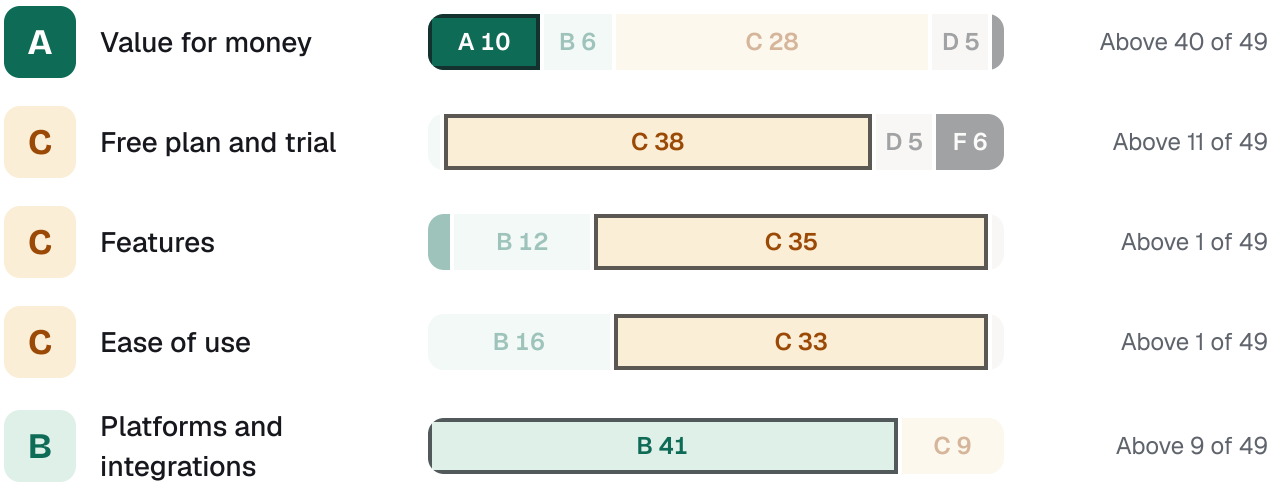

It stands best on value for money (A, above 40 of 49) and worst on features (C, above 1).

Its paid plans start at $17 a month, against a middle price of $49 for the category: 2 of the 39 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

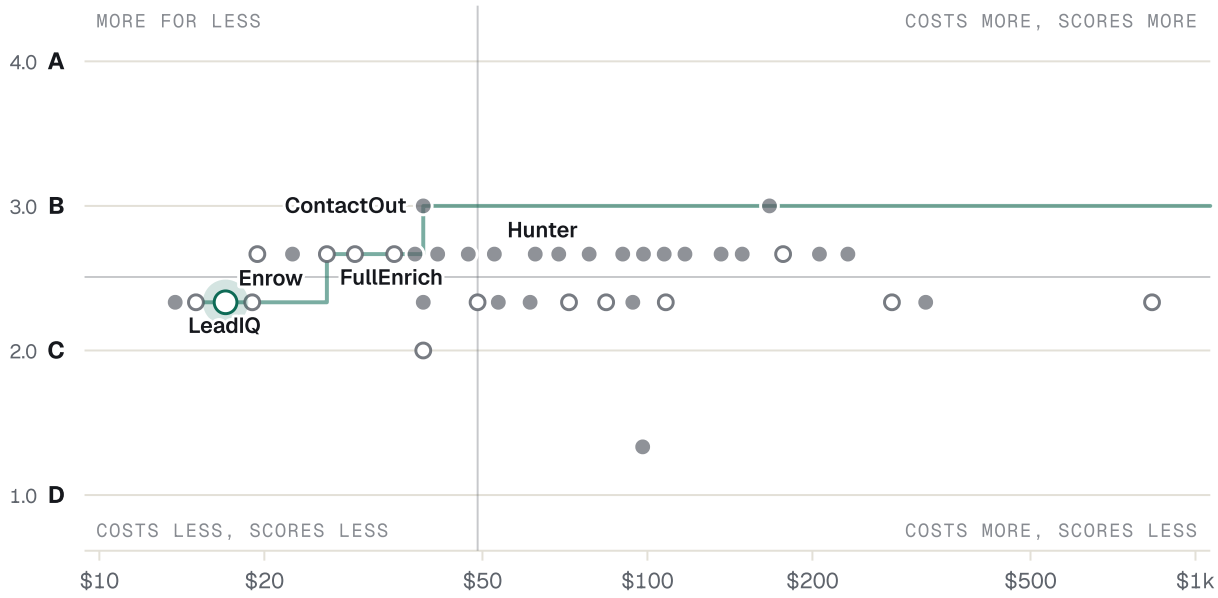

Each grade against the category

Every bar is all 50 lead and email finders we grade, cut by the letter each got. Enrow's own letter is outlined.

Price against what you get

Each dot is one of 40 lead and email finders. Further left costs less; higher up scores better on features, ease of use and platforms. Enrow is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Enrow you could make: web clipper. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

It is one of the better ones too: its GPA of 2.6 is higher than 34 of the 49 other lead and email finders we grade. It costs $204 a year.

What you could make

- Web clipper: an app builder makes this well.

What you could not

- Checking that an address exists without writing to it.

- It plugs into other products, HubSpot, Salesforce and Pipedrive among them, and has an API.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. Enrow's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
