PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

54/70

Other print-on-demand and dropshipping services it is graded above

Eprolo's GPA of 2.8 is higher than 54 of the 70 other print-on-demand and dropshipping services we grade, and level with 6.

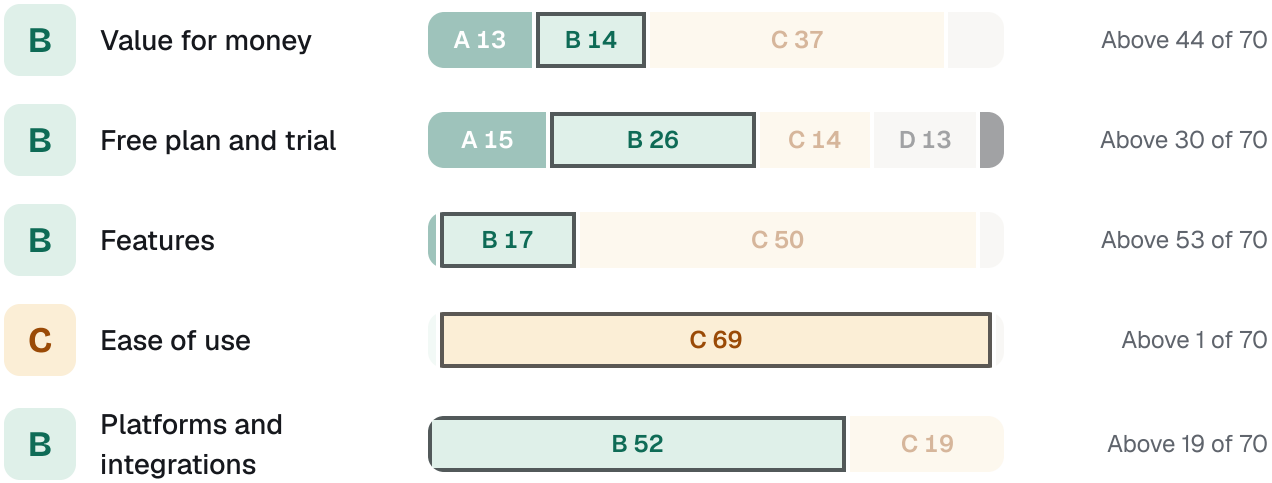

It stands best on features (B, above 53 of 70) and worst on ease of use (C, above 1).

Its paid plans start at $1.66 a month when paid by the year, against a middle price of $25 for the category: 1 of the 36 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

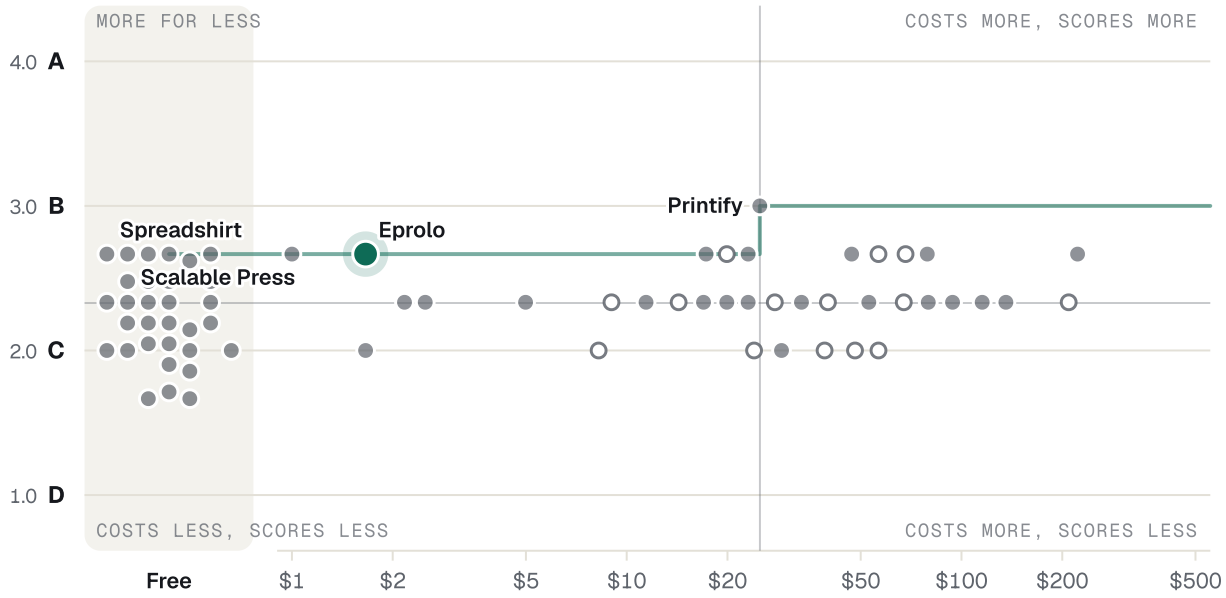

Each grade against the category

Every bar is all 71 print-on-demand and dropshipping services we grade, cut by the letter each got. Eprolo's own letter is outlined.

Price against what you get

Each dot is one of 68 print-on-demand and dropshipping services. Further left costs less; higher up scores better on features, ease of use and platforms. Eprolo is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Eprolo you would be making suppliers who ship each order for you. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.8 is higher than 54 of the 70 other print-on-demand and dropshipping services we grade. It costs $19.90 a year.

What you could make

- Inventory: an app builder makes this well.

What you could not

- Suppliers who ship each order for you.

- Printers that make and ship each order.
- It plugs into other products, Shopify, WooCommerce and Etsy among them.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Eprolo's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
