Eurosender is made by Eurosender.

Where it stands

Its grades against its category, and whether to keep it or make your own

69/80

Other shipping software it is graded above

Eurosender's GPA of 2.8 is higher than 69 of the 80 other shipping software we grade, and level with 6.

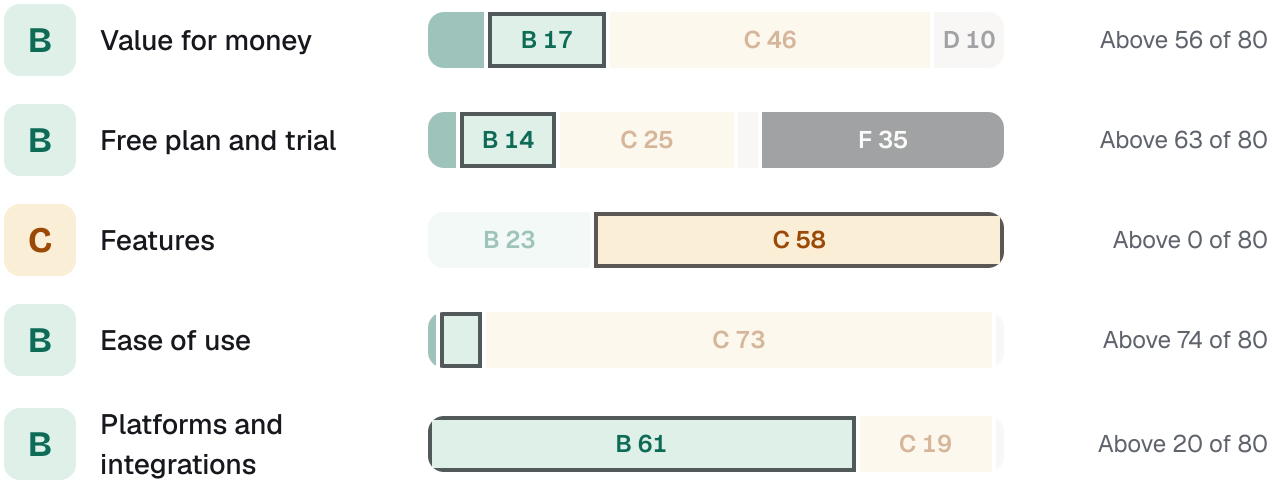

It stands best on ease of use (B, above 74 of 80) and worst on features (C, above 0).

Eurosender has no paid plan.

On features, ease of use and platforms it scores 2.7 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

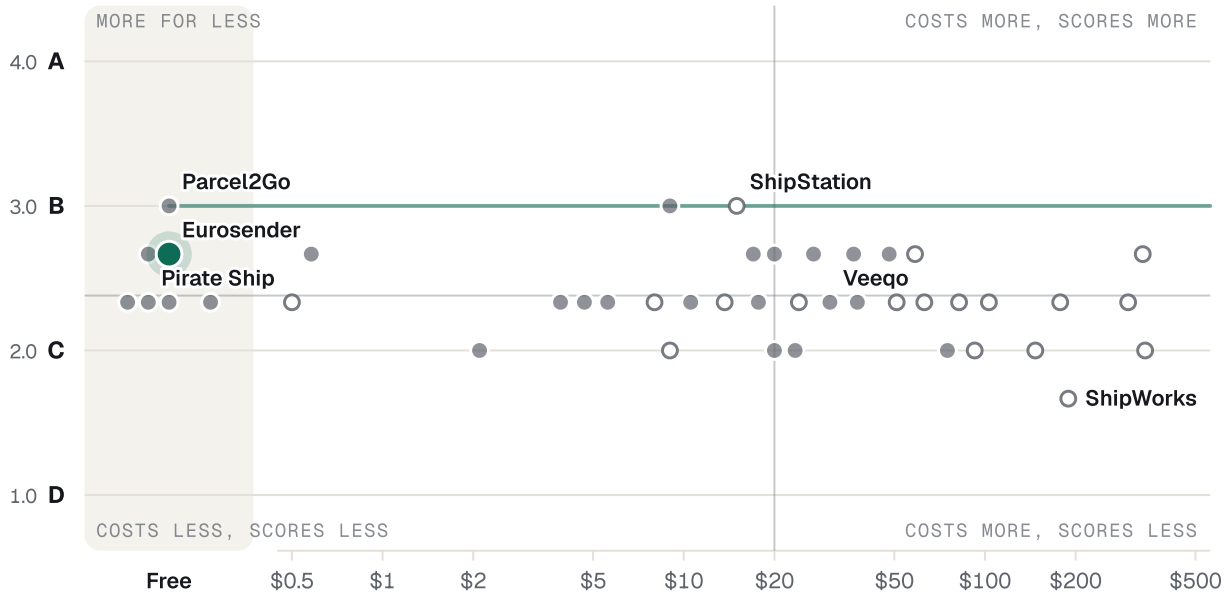

Each grade against the category

Every bar is all 81 shipping software we grade, cut by the letter each got. Eurosender's own letter is outlined.

Price against what you get

Each dot is one of 43 shipping software. Further left costs less; higher up scores better on features, ease of use and platforms. Eurosender is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Eurosender is free, so making your own would save you nothing.

And it is not the kind of software a weekend replaces. It is one of the better ones too: its GPA of 2.8 is higher than 69 of the 80 other shipping software we grade.

What you could make

- Reports: an app builder makes this well.

What you could not

- Discounted carrier rates and labels, which take an agreement with each carrier.

- ✕ A real app for iOS and Android. Something home-made would be a web page.
- ✕ It plugs into other products, Shopify, DHL and UPS among them.

What this rests on. Eurosender's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
