Who EventMobi is for

- ✓ Fits if you run professional conferences with exhibitors and check-in
- ✓ Makes sense if you run two or more events a year

Who it is not for

- ✕ Pricey for one small event, as the start is $3,000
- ✕ Skip it if you only want webinars, since streaming is part of the virtual product
- ✕ Tight on extras, because streaming starts at $500 and standard integrations at $1,000 each
- ✕ Watch out: badges start at $3.99 each, and a hardware rental typically starts at $1,000 for 7 days

Good to know

Good for

- ✓ Associations and corporate teams running multi-day conferences
- ✓ Hybrid events that need registration, badges and an app in one place
- ✓ Organizations running two or more events a year

Worth knowing

- ⓘ Pricing is quote-based. The starting prices are $3,000 per event or $8,900 per year, and both scale with attendee count and products.
- ⓘ Streaming and video storage start at $500 per event, and standard integrations start at $1,000 each.
- ⓘ Pre-printed badges start at $3.99 each, and a hardware rental package for two iPads and printers typically starts at $1,000 for 7 days.
- ⓘ It is event management software first: webinar-style streaming sits in the virtual event product and is not sold on its own.

It stands best on features (B, above 30 of 34) and worst on value for money (D, above 1).

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace EventMobi you would be making live video to hundreds of people at once. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 23 of the 34 other webinar and live streaming tools grade higher. It costs $8,900 a year.

What you could make

- Surveys: an app builder makes this well.

What you could not

- × Live video to hundreds of people at once.

- Selling tickets and checking them at the door.
- It plugs into other products, Zapier among them, and has an API.
- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. EventMobi's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
