Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Ever Gauzy you could make: tasks, time tracking, invoicing, reports and employee records. What surrounds it you could not. The 1 things listed below take a company, not a weekend.

It costs $408 a year. Ever Gauzy is open source, so there is a third way: take its code and run it yourself.

What you could make

- Tasks, time tracking, invoicing, reports and employee records: an app builder makes these well.

What you could not

- Apps for macOS, Windows and Linux that stay in step with each other.

What this rests on. Ever Gauzy's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
