PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

29/80

Other online store builders it is graded above

EverShop's GPA of 2.0 is higher than 29 of the 80 other online store builders we grade, and level with 13.

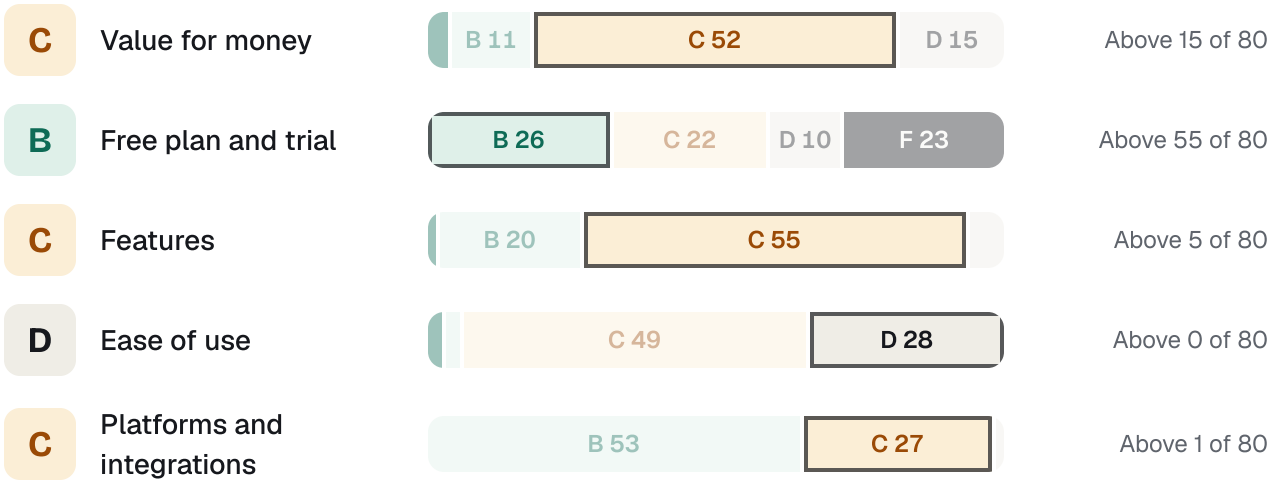

It stands best on free plan and trial (B, above 55 of 80) and worst on ease of use (D, above 0).

EverShop has no paid plan.

On features, ease of use and platforms it scores 1.7 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

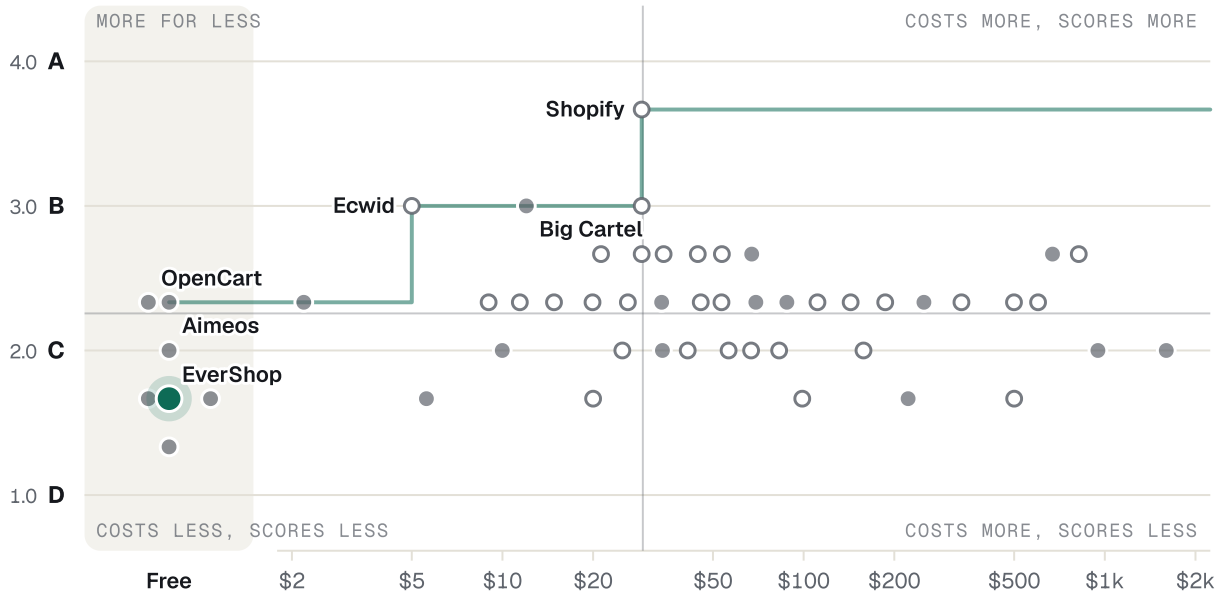

Each grade against the category

Every bar is all 81 online store builders we grade, cut by the letter each got. EverShop's own letter is outlined.

Price against what you get

Each dot is one of 52 online store builders. Further left costs less; higher up scores better on features, ease of use and platforms. EverShop is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

EverShop is free, so making your own would save you nothing.

And it is not the kind of software a weekend replaces.

What you could make

- Templates: an app builder makes this well.

What you could not

- Checkout, card payments and sales tax handled for you.
- It plugs into other products, Stripe, PayPal and Klarna among them, and has an API.

	✕ Hooks into the device itself: widgets.

What this rests on. EverShop's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
