Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Every Time Zone you could make: calendar. What surrounds it you could not. The 2 things listed below take a company, not a weekend.

What you could make

- Calendar: an app builder makes this well.

What you could not

- Booking pages that read and write other people's calendars and send the emails.
- Sharing with other people, which means accounts and invitations.

What this rests on. Every Time Zone's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
