Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 3 of the 72 other inventory management tools we grade

Extensiv makes cloud warehouse management software for third-party logistics providers, with modules for order and inventory management, receiving, billing, shipping and reporting. Its Integration Manager, formerly CartRover, connects orders from online stores. Its site says it has joined forces with Descartes Systems Group.

To get you started, here are **7 things to know about Extensiv**, taken from its own pages and our grades.

> **It publishes no price, routes to a demo, and its home page says it has joined Descartes.**
>
> From our report card of Extensiv

1 **Best for warehouse software for 3PLs**

Extensiv sells warehouse management, billing and scanning tools for third-party logistics firms.

2 **It runs on Web**

Web.

3 **3PL Warehouse Manager**

Cloud order and warehouse management for 3PLs, with mobile barcode scanning, dock scheduling and small parcel shipping.

4 **Billing Manager**

Automates billing for 3PL clients from warehouse activity.

5 **Smartscan**

Mobile scanning for receiving, picking and inventory accuracy.

6 **A 1.6 GPA, above 3 of 72**

That is against the other inventory management tools we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Extensiv you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for warehouse software for 3PLs

Extensiv sells warehouse management, billing and scanning tools for third-party logistics firms. It publishes no price, routes to a demo, and its home page says it has joined Descartes.

TOOLGPA REPORT CARD	Extensiv	Graded Nov 12, 2026
SUBJECT	GRADE	COMMENT
Value for money	C	No price is published; the site routes to a demo and a sales conversation.
Free plan and trial	F	No free plan and no trial on record. Integration Manager shows a Get Started for Free button, but no plan details were readable.
Features	C	3PL warehouse manager, billing, scanning, integrations and labor analytics. It does the 3PL warehouse job, which is narrower than order and planning software.
Ease of use	C	No store rating on record. A warehouse system needs setup, scanners and client accounts.
Platforms and integrations	C	Web only, with Integration Manager the only integration named.
Grade point average		Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Extensiv is for

- ✓ Fits if you run a 3PL warehouse and bill clients for storage and handling
- ✓ Works for warehouses that scan with handhelds

Who it is not for

- ✗ Skip it if you are a brand running its own single warehouse
- ✗ Not for you if you want a price, as it goes through a demo
- ✗ Watch out: the home page says Extensiv has joined forces with Descartes, so packaging may change
- ✗ Skip it if you want a free trial, as no plan details were readable

Good to know

Good for

- ✓ Third-party logistics warehouses billing several clients
- ✓ Fulfillment operators that need scanning, receiving and parcel shipping in one system
- ✓ Brands looking for a 3PL that runs on the same platform

Worth knowing

- ⓘ No prices are published; the site routes to a demo request and a sales conversation.
- ⓘ Built for 3PL warehouses, so a brand running its own single warehouse may find it more than it needs.
- ⓘ Its home page says Extensiv has joined forces with the Descartes Systems Group.
- ⓘ Integration Manager shows a Get Started for Free button, but no price or plan details were readable.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Extensiv's current pricing could not be confirmed from its own site.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

3/72

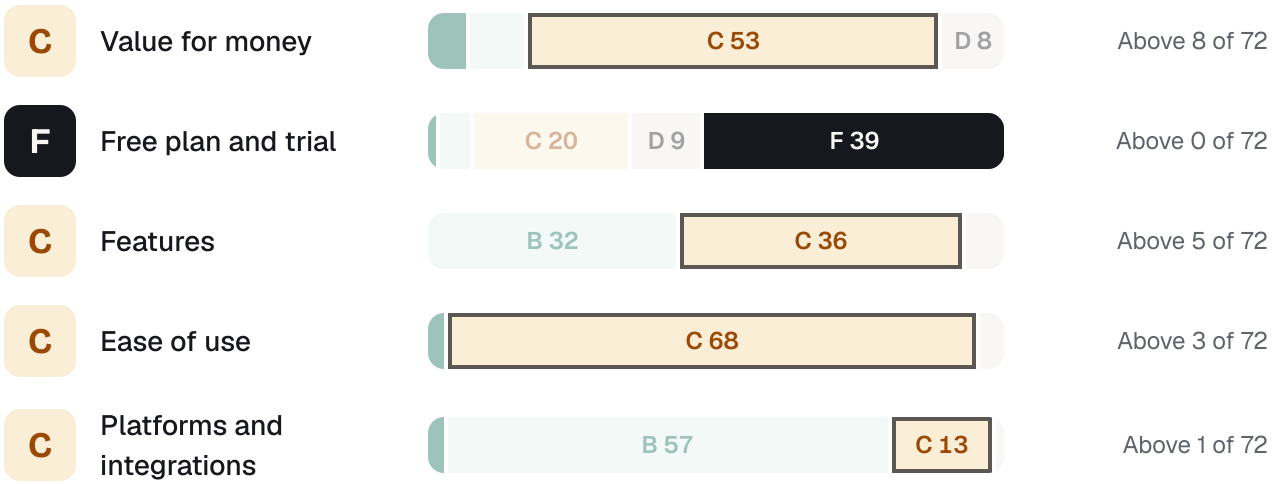

Other inventory management tools it is graded above

Extensiv's GPA of 1.6 is higher than 3 of the 72 other inventory management tools we grade, and level with 7.

It stands best on value for money (C, above 8 of 72) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 73 inventory management tools we grade, cut by the letter each got. Extensiv's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Extensiv you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 62 of the 72 other inventory management tools grade higher.

What you could make

- Inventory and reports: an app builder makes these well.

What you could not

- Discounted carrier rates and labels, which take an agreement with each carrier.
- Scanning barcodes with a phone camera or a scanner.

What this rests on. Extensiv's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
