Where it stands

Its grades against its category, and whether to keep it or make your own

94/127

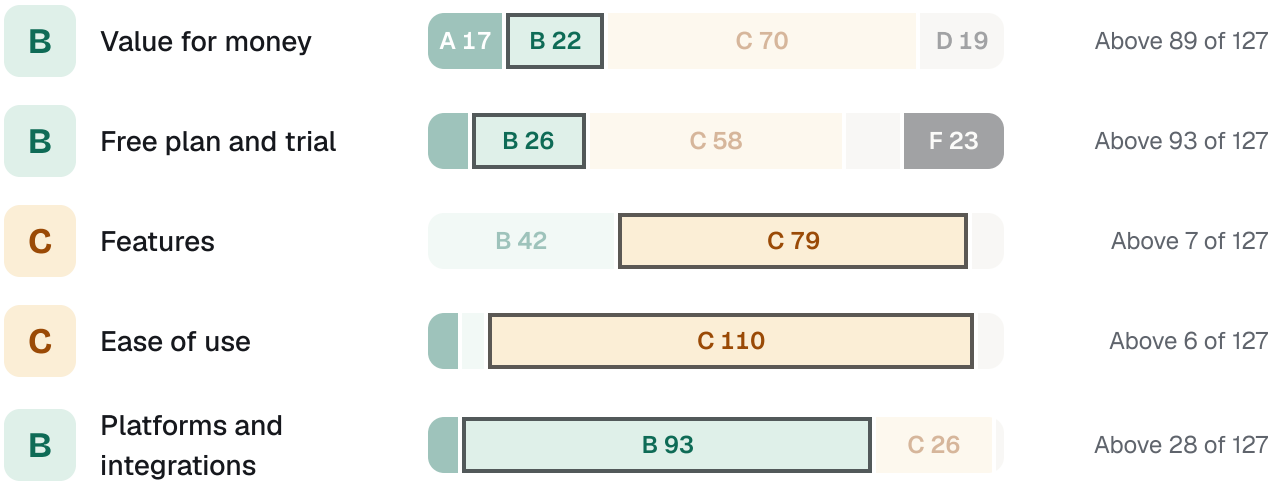

Other accounting and invoicing tools it is graded above

Fakturoid's GPA of 2.6 is higher than 94 of the 127 other accounting and invoicing tools we grade, and level with 14.

It stands best on free plan and trial (B, above 93 of 127) and worst on ease of use (C, above 6).

Each grade against the category

Every bar is all 128 accounting and invoicing tools we grade, cut by the letter each got. Fakturoid's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Fakturoid you could make: invoicing, quotes and estimates, expense tracking, inventory and reports. What surrounds it you could not. The 2 things listed below take a company, not a weekend.

It is one of the better ones too: its GPA of 2.6 is higher than 94 of the 127 other accounting and invoicing tools we grade.

What you could make

- Invoicing, quotes and estimates, expense tracking, inventory and reports: an app builder makes these well.

What you could not

- A real app for iOS and Android. Something home-made would be a web page.
- It plugs into other products, GoPay, PayPal and Pohoda among them, and has an API.

What this rests on. Fakturoid's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
