Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 0 of the 24 other online fax services we grade

FaxCore is enterprise fax server software that can run on your own servers, as a hosted cloud service, or in a hybrid setup where etherFAX handles the fax calls. It connects to email, Active Directory and multifunction printers. Pricing is not published on its site.

To get you started, here are **7 things to know about FaxCore**, taken from its own pages and our grades.

> "
>
> **It is server software with deployment, directory and device connectors to set up.**
>
> From our grade for ease of use

1 **Best for fax servers for organizations**

No prices are published, everything goes through a quote request, and there is no plan for individuals.

2 **It runs on 2 platforms**

Web and Windows.

3 **Three ways to deploy**

The product page lists an on-premise server, a cloud-based SaaS service, and a hybrid in which etherFAX acts as the cloud fax modem.

4 **Appliance and virtual servers**

Turnkey appliances ship with the software and fax boards or FoIP drivers installed, and a virtual appliance runs in a virtual environment.

5 **Standard and Enterprise editions**

The Standard virtual server tops out at 8 fax lines, and the Enterprise server on SQL Server at 1,500 lines, with extra line licenses sold separately.

6 **A 1.6 GPA, above 0 of 24**

That is against the other online fax services we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace FaxCore you would be making fax numbers connected to the phone network. That is not a weekend's work, with an AI app builder or without one.

Who FaxCore is for

- ✓ Fits if you run a company fax server and want it on your own hardware
- ✓ Works for organizations that must link fax to copiers and Active Directory

Who it is not for

- ✕ Skip it if you are one person, as there is no self-serve plan
- ✕ Skip it if you want a price, since every deployment is a request for a quote
- ✕ Watch out: cloud and hybrid are described as usage-priced with no figures
- ✕ Not for you if you want a free trial, as only a demo is offered

Good to know

Good for

- ✓ IT teams replacing an aging fax server
- ✓ Organizations that want fax on their own infrastructure for compliance reasons
- ✓ Companies with many multifunction printers sending fax

Worth knowing

- ⓘ No prices are published; every deployment is quoted through a request for a quote.
- ⓘ The cloud and hybrid options are described as priced on usage, with no figures shown.
- ⓘ Built for organizations, with no self-serve plan for individuals.

Cloud and hybrid are usage-priced with no figures.

From our grade for features

Three ways to deploy

The product page lists an on-premise server, a cloud-based SaaS service, and a hybrid in which etherFAX acts as the cloud fax modem.

Appliance and virtual servers

Turnkey appliances ship with the software and fax boards or FoIP drivers installed, and a virtual appliance runs in a virtual environment.

Standard and Enterprise editions

The Standard virtual server tops out at 8 fax lines, and the Enterprise server on SQL Server at 1,500 lines, with extra line licenses sold separately.

Office 365 and Active Directory

The cloud service uses TLS between FaxCore and Office 365 and integrates with Microsoft Active Directory.

Where it stands

Its grades against its category, and whether to keep it or make your own

0/24

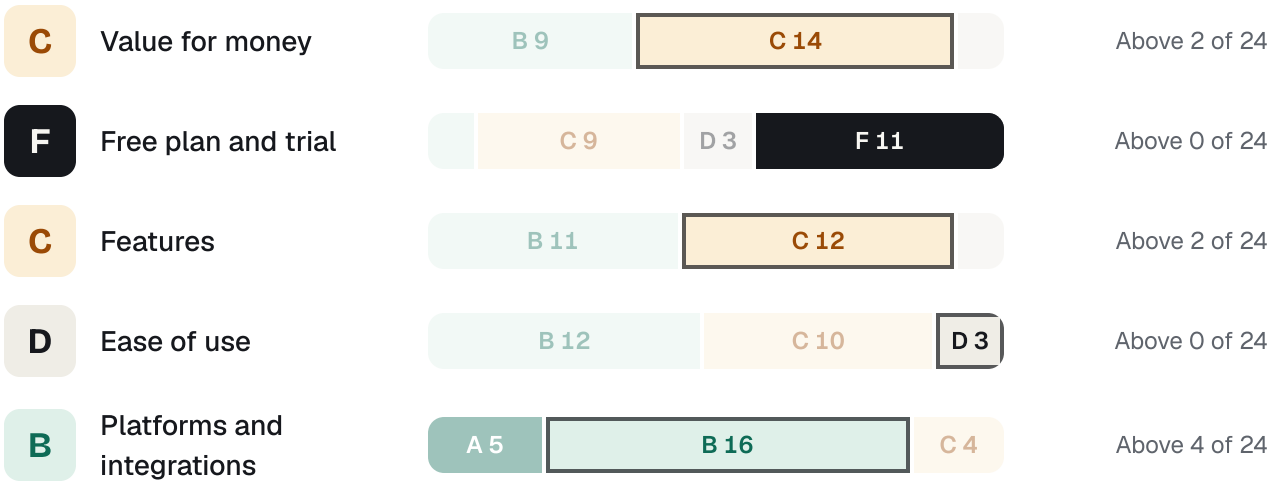

Other online fax services it is graded above

FaxCore's GPA of 1.6 is higher than 0 of the 24 other online fax services we grade.

It stands best on platforms and integrations (B, above 4 of 24) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 25 online fax services we grade, cut by the letter each got. FaxCore's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace FaxCore you would be making fax numbers connected to the phone network. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 24 of the 24 other online fax services grade higher.

What you could not

- ✕ Fax numbers connected to the phone network.
- ✕ Connections to other products, each kept working as those products change.
- ✕ A real app for Windows. Something home-made would be a web page.

What this rests on. FaxCore's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
