Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

You could make this

What Fedica does at its core is reports, and that is the kind of thing an AI app builder makes well.

You would give up 2 things, listed below, and little else. It costs $120 a year. An AI app builder starts at about $20 a month on our listings, and you only need it while you build.

What you could make

- Reports: an app builder makes this well.
- It runs in a browser, which is where something home-made would run too.

What you could not

- It plugs into other products, Bluesky, Facebook and Instagram among them, and has an API.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. Fedica's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
