Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 31 of the 87 other field service apps we grade

FieldCamp is field service management software that pairs a back office for scheduling, dispatch, invoicing and payments with AI agents, including an AI customer-service rep that answers calls and books jobs. It targets trades from HVAC to cleaning and pest control. Pricing is quoted per business on a call.

- ✓ Fits if you want an AI to answer calls and book jobs for your trade business
- ✓ Works for teams that want to read from Jobber or Housecall Pro

Who it is not for

- ⓘ The four plans (Pro, Growth, Scale, Enterprise) differ in permissions, support and terms, not in core features.
- ⓘ Seats beyond those included are added at a rate set out in the quote, not a list price.

Where it stands

Its grades against its category, and whether to keep it or make your own

31/87

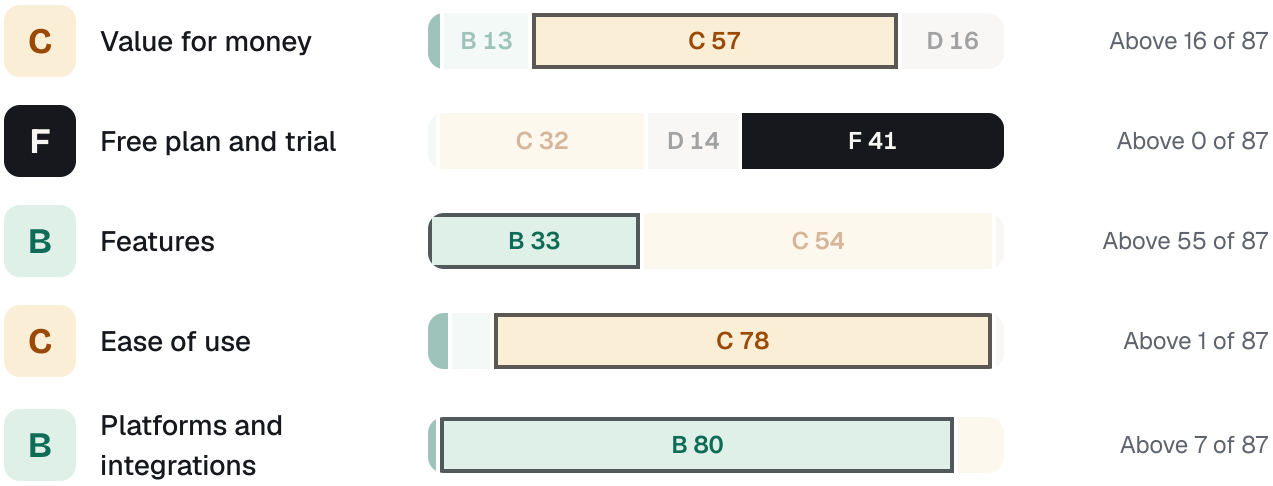

Other field service apps it is graded above

FieldCamp's GPA of 2.0 is higher than 31 of the 87 other field service apps we grade, and level with 23.

It stands best on features (B, above 55 of 87) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 88 field service apps we grade, cut by the letter each got. FieldCamp's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace FieldCamp you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

What you could make

- Job scheduling, invoicing and quotes and estimates: an app builder makes these well.

What you could not

- An AI agent, with the models and the safeguards behind it.
- Connections to other products, each kept working as those products change.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. FieldCamp's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
