PART 04 · STANDING

Where it stands

Fineshare's GPA of 2.2 is higher than 30 of the 72 other AI voice generators we grade, and level with 16.

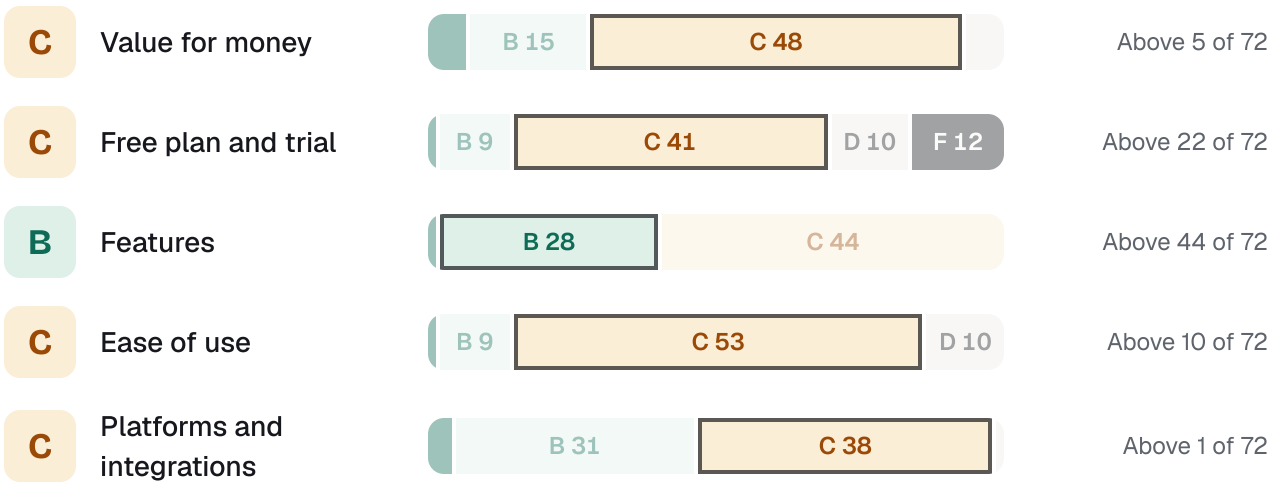

It stands best on features (B, above 44 of 72) and worst on platforms and integrations (C, above 1).

Each dot is one of 52 AI voice generators. Further left costs less; higher up scores better on features, ease of use and platforms. Fineshare is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Fineshare you would be making a voice model, which you can rent by the minute but not make. That is not a weekend's work, with an AI app builder or without one.

It costs $71.88 a year.

What you could not

- ✕ A voice model, which you can rent by the minute but not make.
- ✕ A voice model trained on your recordings.

- ✕ A video model, which you can rent by the second but not make.
- ✕ Speech turned into text you can trust.
- ✕ An API that other software can build on.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Fineshare's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
