Who FlagShip is for

Who it is not for

- ✗ Skip it if you want a published price list, as costs show only inside an account

- ✗ Watch out: brokerage fees go to your account on ground shipments across the border without a broker
- ✗ Tight if you ship outside the carriers it resells

- ✓ Canadian small businesses that ship a few parcels a week
- ✓ Sellers who want live phone support from shipping staff

Worth knowing

- ⓘ No published price list: the cost of each shipment is only shown inside an account.
- ⓘ For ground shipments across the border, brokerage fees are billed to your account if you have no customs broker.

Where it stands

Its grades against its category, and whether to keep it or make your own

69/80

Other shipping software it is graded above

FlagShip's GPA of 2.8 is higher than 69 of the 80 other shipping software we grade, and level with 6.

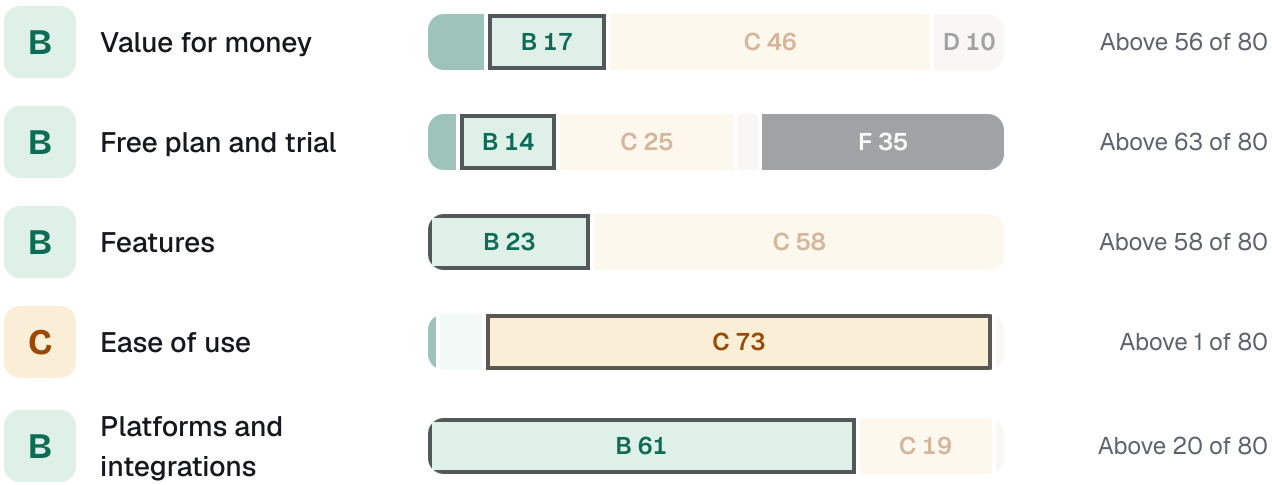

It stands best on free plan and trial (B, above 63 of 80) and worst on ease of use (C, above 1).

FlagShip has no paid plan.

On features, ease of use and platforms it scores 2.7 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

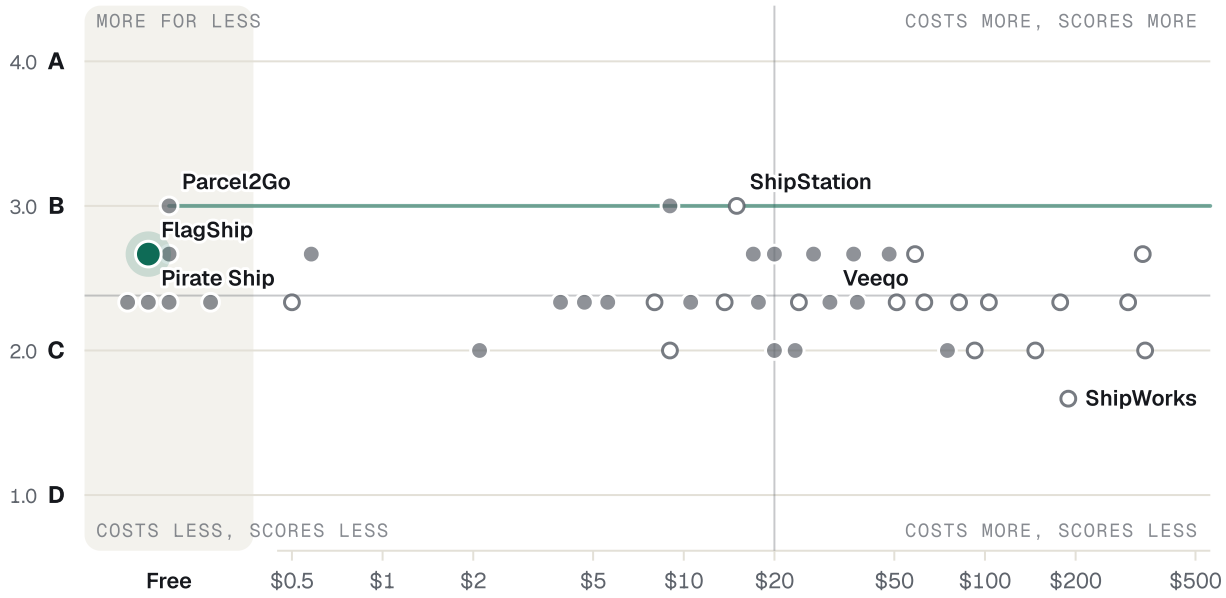

Each grade against the category

Every bar is all 81 shipping software we grade, cut by the letter each got. FlagShip's own letter is outlined.

Price against what you get

Each dot is one of 43 shipping software. Further left costs less; higher up scores better on features, ease of use and platforms. FlagShip is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

FlagShip is free, so making your own would save you nothing.

And it is not the kind of software a weekend replaces. It is one of the better ones too: its GPA of 2.8 is higher than 69 of the 80 other shipping software we grade.

What you could not

- ✕ Discounted carrier rates and labels, which take an agreement with each carrier.
- ✕ Connections to other products, each kept working as those products change.
- ✕ A real app for iOS and Android. Something home-made would be a web page.

- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. FlagShip's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
