It costs $96 a year.

What you could make

- Templates: an app builder makes this well.

What you could not

- An image model, which you can rent by the picture but not make.

- ✕ A video model, which you can rent by the second but not make.
- ✕ Ad images and videos made to each network's sizes.
- ✕ An API that other software can build on.

What this rests on. Flair.ai's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
