Flawless builds AI tools for film and television post-production. DeepEditor changes or adds dialogue on existing shots, and TrueSync localizes dialogue with matched lip movement. The company says it works with studios, guilds and unions, and pricing is available only by contacting its enterprise sales team.

To get you started, here are **7 things to know about Flawless**, taken from its own pages and our grades.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

2/72

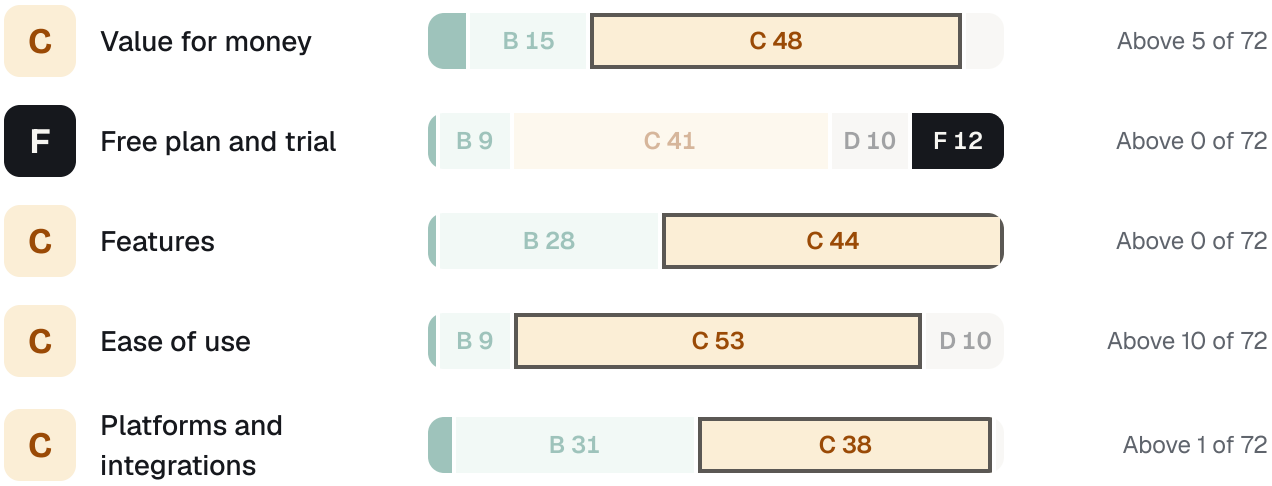

Other AI voice generators it is graded above

Flawless's GPA of 1.6 is higher than 2 of the 72 other AI voice generators we grade, and level with 2.

It stands best on ease of use (C, above 10 of 72) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 73 AI voice generators we grade, cut by the letter each got. Flawless's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Flawless you would be making a video editor. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 68 of the 72 other AI voice generators grade higher.

What you could not

- ✕ A video editor.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Flawless's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
