Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 88 of the 148 other form and survey tools we grade

Formcarry gives an HTML form a hosted endpoint, so a static site can collect submissions without its own server. It filters spam, stores entries and emails them to the site owner, and can forward them to other tools. Plans are priced by submissions per month, and a REST API and an MCP server for AI apps are included.

To get you started, here are **9 things to know about Formcarry**, taken from its own pages and our grades.

> **No store rating on record, and it is a web app where the work is writing the form and wiring it up, so it sits at C.**
