Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 88 of the 148 other form and survey tools we grade

Formlets is a browser-based form builder for contact forms, order forms and surveys. Forms are built by drag and drop, can span several pages and columns, and send submissions by email, to a spreadsheet export or to other apps. The free plan is limited to one published form, and paid plans raise that cap and remove the Formlets branding.

To get you started, here are **9 things to know about Formlets**, taken from its own pages and our grades.

> **No store rating on record, and it is a web app where the work is building each form, so it sits at C.**
>
> From our grade for ease of use

1 **Best for a drag-and-drop form builder with unlimited responses**

Formlets is a drag-and-drop form builder with unlimited responses on the free plan.

2 **Paid plans start at $20 a month**

As its pricing page puts it: $20 per month, billed annually ($24 billed monthly).

3 There is a free plan

Personal plan: 1 published form, unlimited responses, multi-page and multi-column layouts and integrations, with Formlets branding on the form.

4 It runs on Web

Web.

5 Drag-and-drop designer

Build forms by dragging fields into place, with multi-page and multi-column layouts, themes, a header image and right-to-left text.

6 Conditional display and calculations

Show or hide fields based on earlier answers and compute values from other fields. Conditional display is a paid-plan feature.

7 File uploads

Accept multiple files per form with size and image-dimension limits. Paid plans include 3 GB to 100 GB of storage.

8 A 2.4 GPA, above 88 of 148

That is against the other form and survey tools we grade, on value, the free plan, features, ease of use and platforms.

9 Keep it

To replace Formlets you would be making a builder that other people can use without writing code. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for a drag-and-drop form builder with unlimited responses

Formlets is a drag-and-drop form builder with unlimited responses on the free plan. That plan publishes 1 form and shows Formlets branding, and payments, conditional fields and your own domain need a paid plan.

TOOLGPA REPORT CARD — **Formlets** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	Small Business is $20 a month billed annually, in the middle of form tools, and prices exclude VAT.
Free plan and trial	C	The free plan publishes 1 form with unlimited responses and Formlets branding.

SUBJECT	GRADE	COMMENT
Features	B	Drag-and-drop designer, conditional display, calculations, uploads, payments, e-signatures, integrations and teams. Nothing in the listing is missing from the job.
Ease of use	C	No store rating on record, and it is a web app where the work is building each form, so it sits at C.
Platforms and integrations	B	Web only, with three listed integrations and API-style delivery options.
Grade point average		Fair, out of 4.0 **2.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Formlets is for

- ✓ Fits if you need one form with unlimited responses
- ✓ Works for people who want calculations and e-signatures

Who it is not for

- ✗ Tight if you want more than 1 published form, as that needs a paid plan
- ✗ Watch out: payments, conditional fields and a custom domain need a paid plan
- ✗ Watch out: prices exclude VAT, with 21% added for EU customers without a VAT number
- ✗ Watch out: the pricing page lists an 'OLD Small Business' tier and plans that repeat each other

Good to know

Good for

- A single contact form that needs no cost
- Small sites that want payment forms or file uploads without per-response limits
- Agencies managing forms for several clients

Worth knowing

- The free plan publishes one form only and keeps Formlets branding on it.
- Conditional fields, payments and a custom domain need a paid plan; a form address on your own domain starts at Professional.
- Prices are shown excluding VAT, and 21% VAT applies to EU customers without a VAT number and to Belgian customers.
- The page also lists an 'OLD Small Business' tier at $15 and a 'Full service' tier at $118.33 a month, and Plus and Business repeat the features of the tier below.

Drag-and-drop designer

Build forms by dragging fields into place, with multi-page and multi-column layouts, themes, a header image and right-to-left text.

Conditional display and calculations

Show or hide fields based on earlier answers and compute values from other fields. Conditional display is a paid-plan feature.

File uploads

Accept multiple files per form with size and image-dimension limits. Paid plans include 3 GB to 100 GB of storage.

Payments and e-signatures

Collect Stripe and PayPal payments on paid plans, and add a signature field to a form.

Delivery and integrations

Submissions go to email, an endpoint or Zapier, and the vendor says it connects to over 2000 platforms. Forms embed by iframe or modal.

Teams and custom builds

Higher plans add team accounts, and the Agency plan includes custom functionality built by the vendor.

Where it stands

Its grades against its category, and whether to keep it or make your own

88/148

Other form and survey tools it is graded above

Formlets's GPA of 2.4 is higher than 88 of the 148 other form and survey tools we grade, and level with 27.

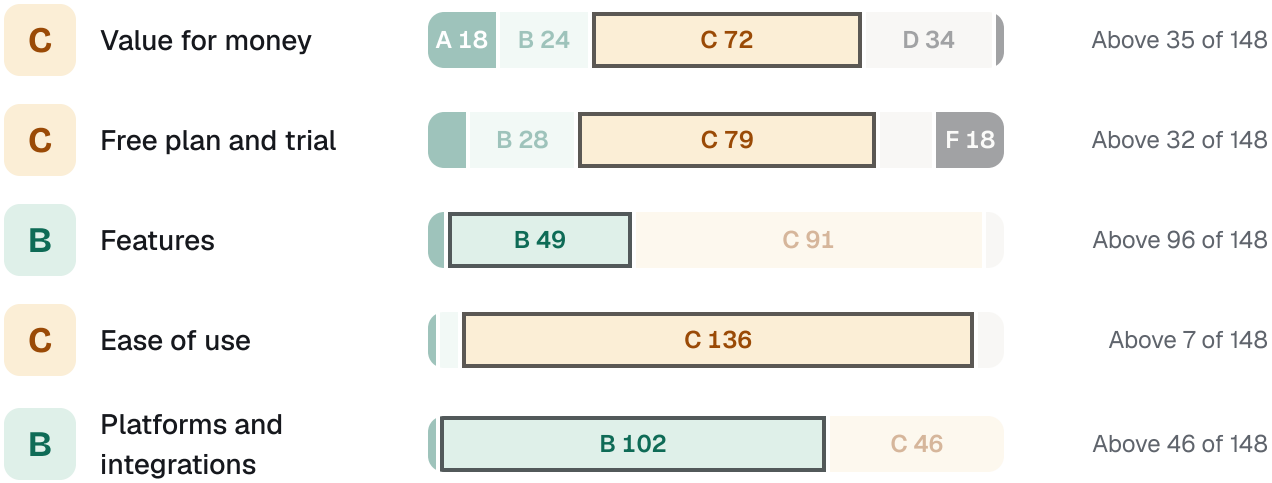

It stands best on features (B, above 96 of 148) and worst on ease of use (C, above 7).

Its paid plans start at $20 a month, against a middle price of $20 for the category: 57 of the 114 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. 1 tool scores higher and costs less.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Formlets you would be making a builder that other people can use without writing code. That is not a weekend's work, with an AI app builder or without one.

It costs $240 a year.

What you could make

- Forms and templates: an app builder makes these well.

What you could not

- A builder that other people can use without writing code.

- Connections to other products, each kept working as those products change.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Formlets's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
