Welcome

What it is, who it suits, its grades and the ten things to know first

2.6

GPA, above 116 of the 148 other form and survey tools we grade

Form Vibes is a WordPress plugin that saves entries from other form builders into the site's own database. It adds a searchable entries table, submission charts and CSV export. It works alongside Elementor forms, Contact Form 7, WPForms, Gravity Forms and others rather than replacing them.

To get you started, here are **9 things to know about Form Vibes**, taken from its own pages and our grades.

> **It does not build forms, so you need another plugin for that, and editing, notes and Google Sheets export are Pro.**
>
> From our report card of Form Vibes

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

You could make this

A form at its plainest is questions, a button and a table of answers.

What Form Vibes does at its core is forms and reports, and that is the kind of thing an AI app builder makes well. You would give up 2 things, listed below, and little else. It costs $49 a year. An AI app builder starts at about $20 a month on our listings, and you only need it while you build.

What you could make

- Forms and reports: an app builder makes these well.

What you could not

- ✕ It plugs into other products, Elementor, Contact Form 7 and WPForms among them.

It runs in a browser, which is where something home-made would run too.

× Hooks into the device itself: widgets.

What this rests on. Form Vibes's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
