GPA, above 22 of the 101 other HR software we grade

Fuel50 is a skills and talent platform for large employers. It covers a skills ontology and inventory, internal mobility, gigs, career development and succession planning, plus AI agents for career and leadership coaching. Plans are bundles of modules sold on request.

To get you started, here are **7 things to know about Fuel50**, taken from its own pages and our grades.

> **No store rating on record, and you'd set it up with your own people data first, so it's an ordinary C.**

TOOLGPA REPORT CARD	Fuel50	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	C	No price is published, so there's nothing to set against the $2 to $9 a seat a month this category charges. That leaves it at C.
Free plan and trial	F	No free plan and no trial is listed. You start with a demo request.
Features	B	Skills, internal mobility and a talent marketplace across three plans. The listing names no gap in that job.
Ease of use	C	No store rating on record, and you'd set it up with your own people data first, so it's an ordinary C.
Platforms and integrations	C	Web only on record, with no integrations listed.
Grade point average		Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Good to know

Good for

Where it stands

Its grades against its category, and whether to keep it or make your own

22/101

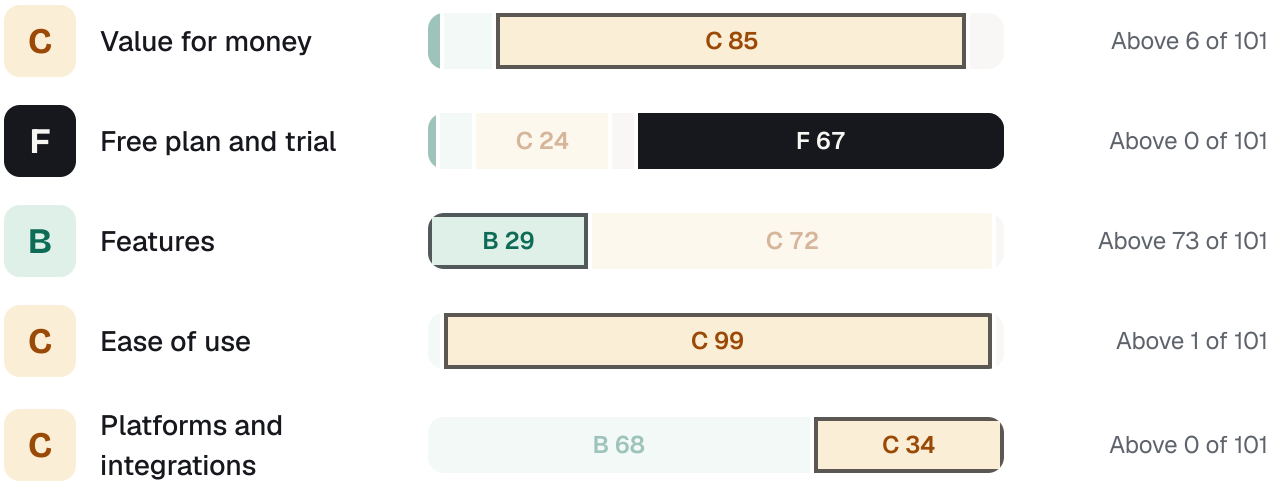

Other HR software it is graded above

Fuel50's GPA of 1.8 is higher than 22 of the 101 other HR software we grade, and level with 33.

It stands best on features (B, above 73 of 101) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 102 HR software we grade, cut by the letter each got. Fuel50's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Fuel50 you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 46 of the 101 other HR software grade higher.

What you could make

- Reports: an app builder makes this well.

What you could not

- An AI agent, with the models and the safeguards behind it.
- People on the other end: coaches. No app builder makes those.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Fuel50's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
