PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

Its paid plans start at $8.25 a month when paid by the year for each person, against a middle price of $9 for the category: 54 of the 121 others that charge start lower.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Gantter you could make: Gantt & timelines and reports. What surrounds it you could not. The 2 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 80 of the 149 other project management tools grade higher. It costs $99 a year.

What you could make

- Gantt & timelines and reports: an app builder makes these well.

What you could not

- Several people working in it at the same moment.

	× AI features, unless you pay a model provider for each request yourself.

What this rests on. Gantter's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
