Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 33 of the 70 other print-on-demand and dropshipping services we grade

Gearment prints and ships custom apparel, drinkware, home goods and accessories for online sellers, working from its own production sites in Texas and California. Sellers connect a store or the API, upload designs and pay a base cost per item. It also offers Amazon FBA printing, marketplace shipping labels, branding inserts and warehousing for stock that sellers send in.

To get you started, here are **8 things to know about Gearment**, taken from its own pages and our grades.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

33/70

Other print-on-demand and dropshipping services it is graded above

Gearment's GPA of 2.4 is higher than 33 of the 70 other print-on-demand and dropshipping services we grade, and level with 11.

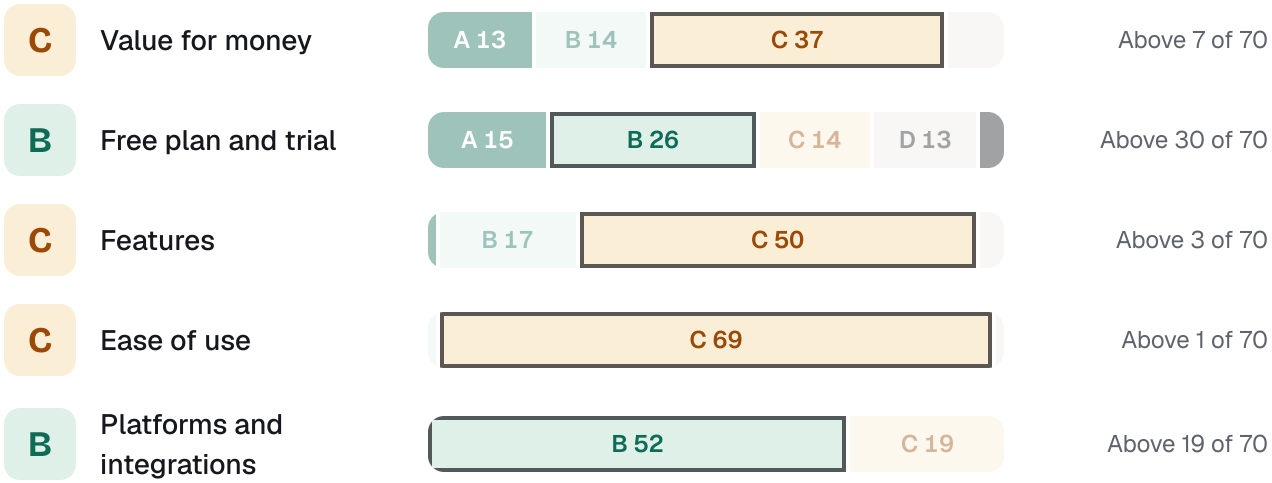

It stands best on free plan and trial (B, above 30 of 70) and worst on ease of use (C, above 1).

Gearment has no paid plan.

On features, ease of use and platforms it scores 2.3 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

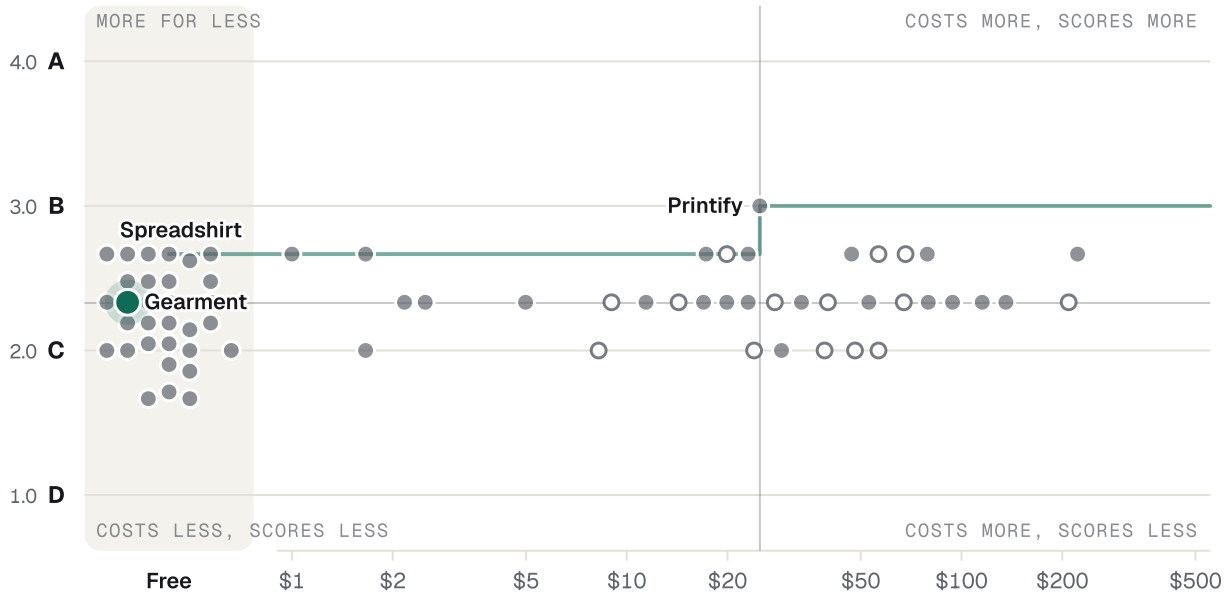

Each grade against the category

Every bar is all 71 print-on-demand and dropshipping services we grade, cut by the letter each got. Gearment's own letter is outlined.

Price against what you get

Each dot is one of 68 print-on-demand and dropshipping services. Further left costs less; higher up scores better on features, ease of use and platforms. Gearment is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Gearment is free, so making your own would save you nothing.

And it is not the kind of software a weekend replaces.

What you could not

- ✕ Printers that make and ship each order.
- ✕ Suppliers who ship each order for you.
- ✕ Discounted carrier rates and labels, which take an agreement with each carrier.
- ✕ Data from Amazon's seller tools and years of sales estimates.

- ✕ It plugs into other products, Amazon, Shopify and Etsy among them, and has an API.

What this rests on. Gearment's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
