GPA, above 69 of the 186 other desktop utilities we grade

Geek Uninstaller is a small, portable Windows uninstaller. After a program's own uninstaller runs, it scans for leftover files and registry entries and removes them, and a Force Removal mode handles broken installs. The free edition is for personal use; a paid Pro edition, which the vendor describes as a special edition of Uninstall Tool, adds batch removal and an installation monitor.

Where it stands

Its grades against its category, and whether to keep it or make your own

69/186

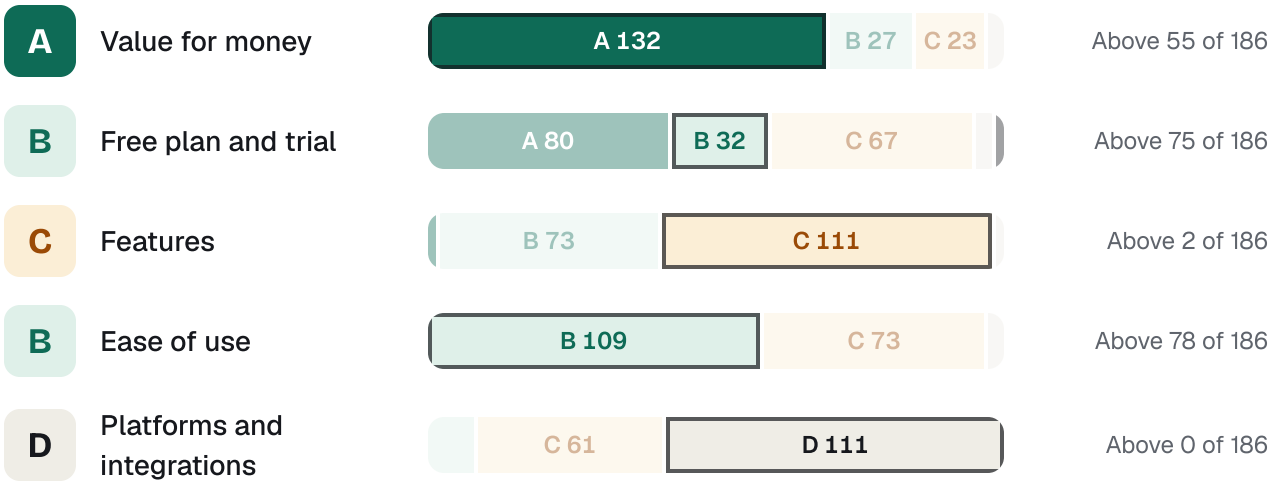

Other desktop utilities it is graded above

Geek Uninstaller's GPA of 2.6 is higher than 69 of the 186 other desktop utilities we grade, and level with 46.

It stands best on value for money (A, above 55 of 186) and worst on platforms and integrations (D, above 0).

Each grade against the category

Every bar is all 187 desktop utilities we grade, cut by the letter each got. Geek Uninstaller's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Your call

It depends on the utility: a converter or a calculator is an afternoon.

Geek Uninstaller sits between: not beyond making, and not a weekend's work either. What you would give up is listed below. Whether that is worth the price is your call. At $24.95, paid once, it costs less than the weekend it would take to replace, which is the argument for keeping it.

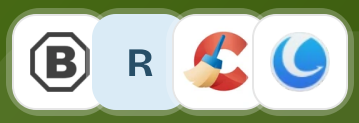

What you could not

- ✕ Deleting system files without breaking anything.
- ✕ A real app for Windows. Something home-made would be a web page.

What this rests on. Geek Uninstaller's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
