Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 0 of the 25 other browsers we grade

Ghost Browser is a Chromium-based desktop browser from Webatix, Inc. Workspaces and Identities keep cookie jars separate so you can sign in to several accounts of the same site in one window, and a Pro plan assigns a different proxy to each tab, Identity or Workspace. Chrome extensions can be imported, and teams can share settings through private data sync.

To get you started, here are **9 things to know about Ghost Browser**, taken from its own pages and our grades.

> "
>
> **You set up identities, workspaces and proxies yourself, so there's a learning curve.**

From our grade for ease of use

1 **Best for logging into many accounts and proxies at once**

Ghost Browser is a Chromium browser that gives each account its own cookie jar, so several logins to one site work side by side.

2 **Paid plans start at $21 a month**

As its pricing page puts it: $21 per month, billed annually.

3 There is a free plan

Free version with up to three Identities, no credit card or account, and Ghost Proxy Control by Workspace or Identity (not by tab).

4 It runs on 3 platforms

Windows, macOS and Linux.

5 Identities

Permanent or temporary Identities give each account its own cookie jar, so several logins to one site work side by side.

6 Workspaces

Tabs are grouped into Workspaces, and the paid plans allow several open at once.

7 Proxy control

A different proxy can be assigned to each tab or group of tabs on the Pro plan.

8 A 1.8 GPA, above 0 of 25

That is against the other browsers we grade, on value, the free plan, features, ease of use and platforms.

9 Keep it

To replace Ghost Browser you would be making a web browser. That is not a weekend's work, with an AI app builder or without one.

Where it stands

Its grades against its category, and whether to keep it or make your own

It stands best on platforms and integrations (C, above 1 of 25) and worst on value for money (D, above 0).

Its paid plans start at $21 a month, against a middle price of $8.33 for the category: 10 of the 10 others that charge start lower.

Each grade against the category

Every bar is all 26 browsers we grade, cut by the letter each got. Ghost Browser's own letter is outlined.

Price against what you get

Each dot is one of 24 browsers. Further left costs less; higher up scores better on features, ease of use and platforms. Ghost Browser is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Ghost Browser you would be making a web browser. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 25 of the 25 other browsers grade higher. It costs $252 a year.

What you could not

- ✕ A web browser.
- ✕ Files kept in step across devices without losing one.
- ✕ Apps for macOS, Windows and Linux that stay in step with each other.

- ✕ Sharing with other people, which means accounts and invitations.

What this rests on. Ghost Browser's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
